GREENHOUSE MICRO DRIP IRRIGATION KIT PART LIST

Come with All Accessories for Installation
Just Open It and DIY

Misting Cooling System Kits

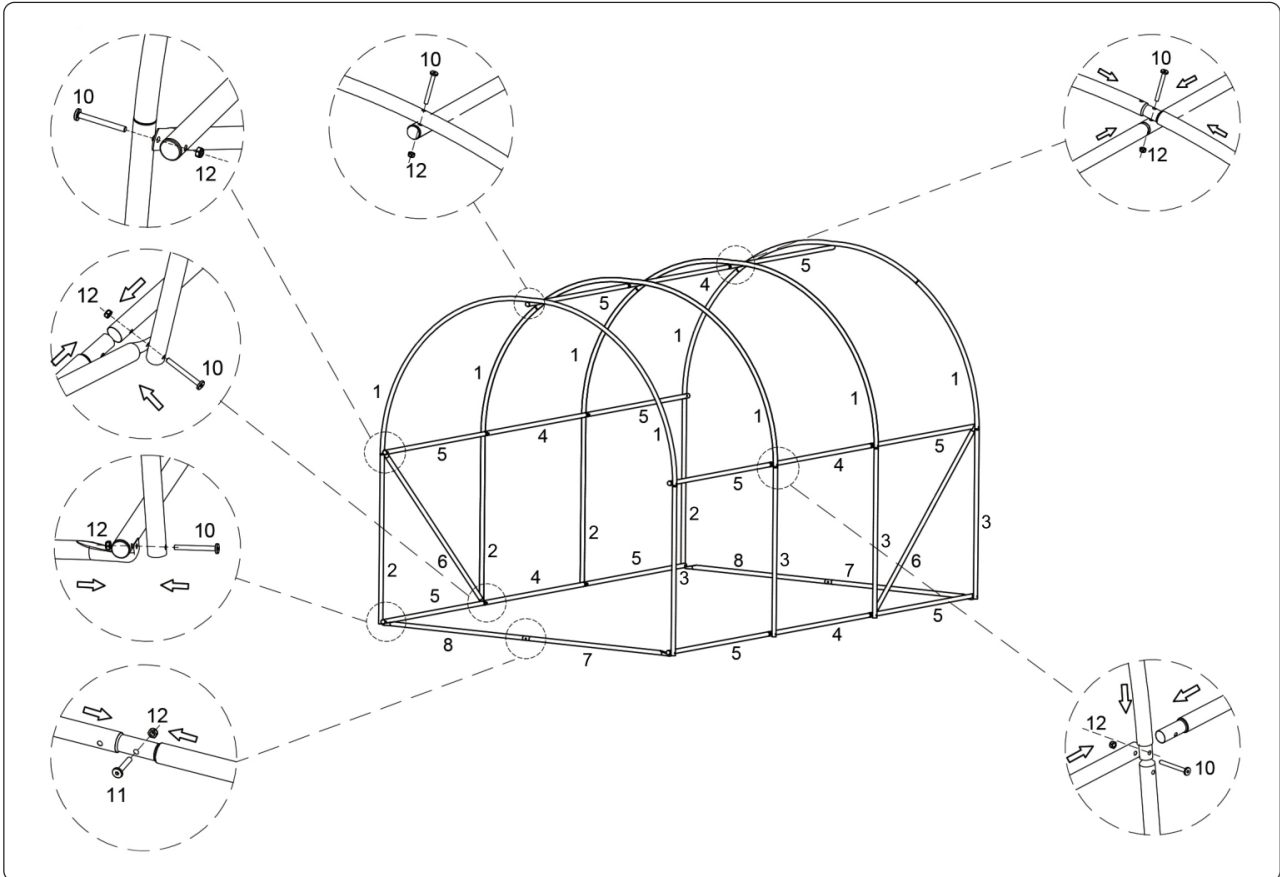

WARNING:

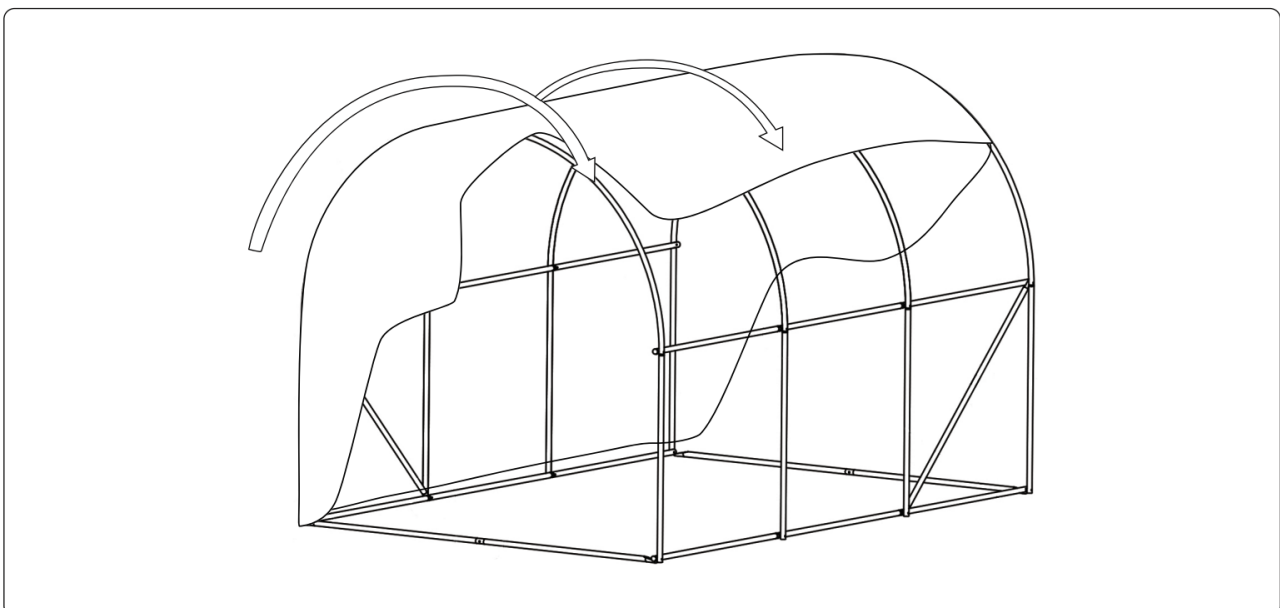

- 1 The installation of the tent requires two (2) persons.
- 2 Please take appropriate actions to protect the tent, as heavy rain, wind and snow can damage the tent. If necessary, please disassemble and store for it later use.
- 3 In snowy conditions please do not allow the accumulation of the snow on the top of the tent to exceed 5cm in thickness. Snow should be cleared as soon as possible for your safety.
- 4 For Maximum stability of your polytunnel, please dig trench to bury base frame poles and back fill covering flaps of plastic canopy.
- 5 Tent should be placed on flat ground. Do not place tent near any fire.
- 6 If water pockets form on the roof during heavy rain, it is your responsibility to remove them in a timely and careful manner.
- 7 When storing the tent, be sure to clean all parts (especially the tarpaulin) beforehand. The tent should be packed in dry condition. Also, the tent should be stored in a dry place.
- 8 Before building the tent, check the completeness and functionality of all parts required for the installation.

STEP 1

Note: Assemble the entire frame of the greenhouse before tightening all the screws into the final position.

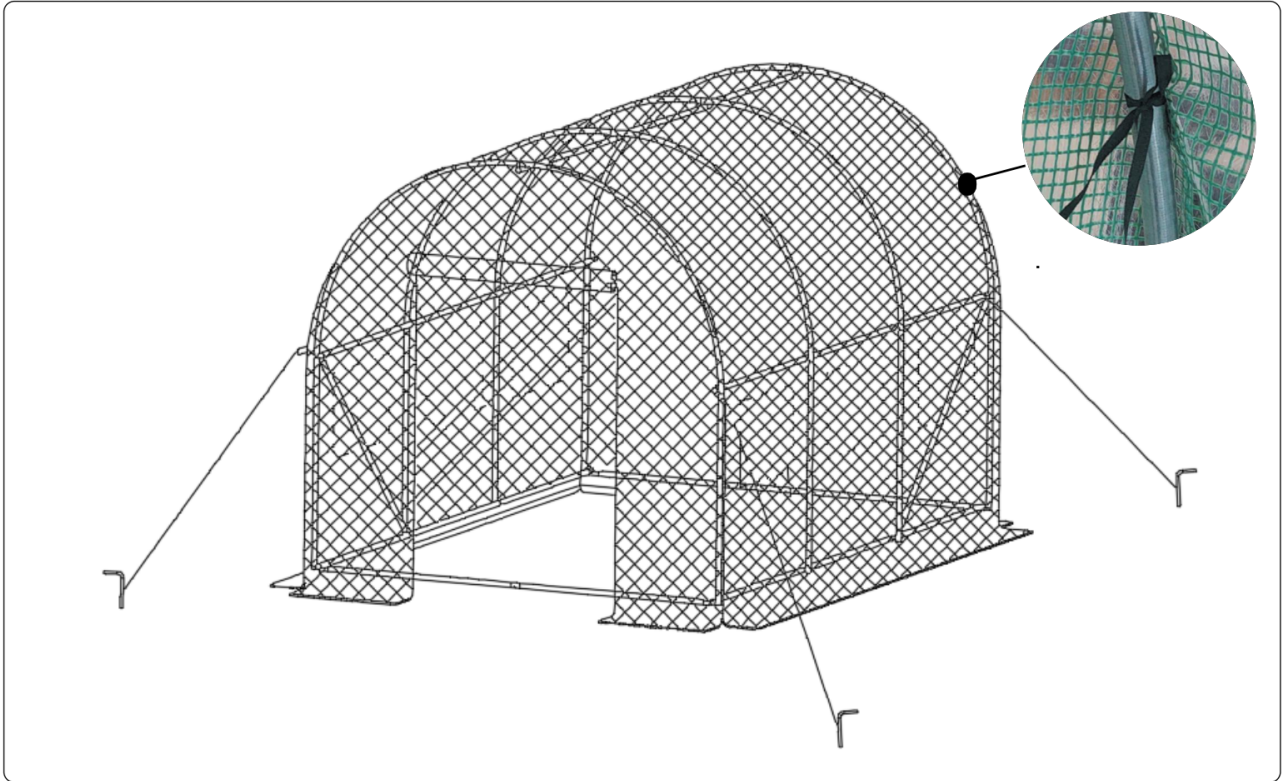

STEP 2

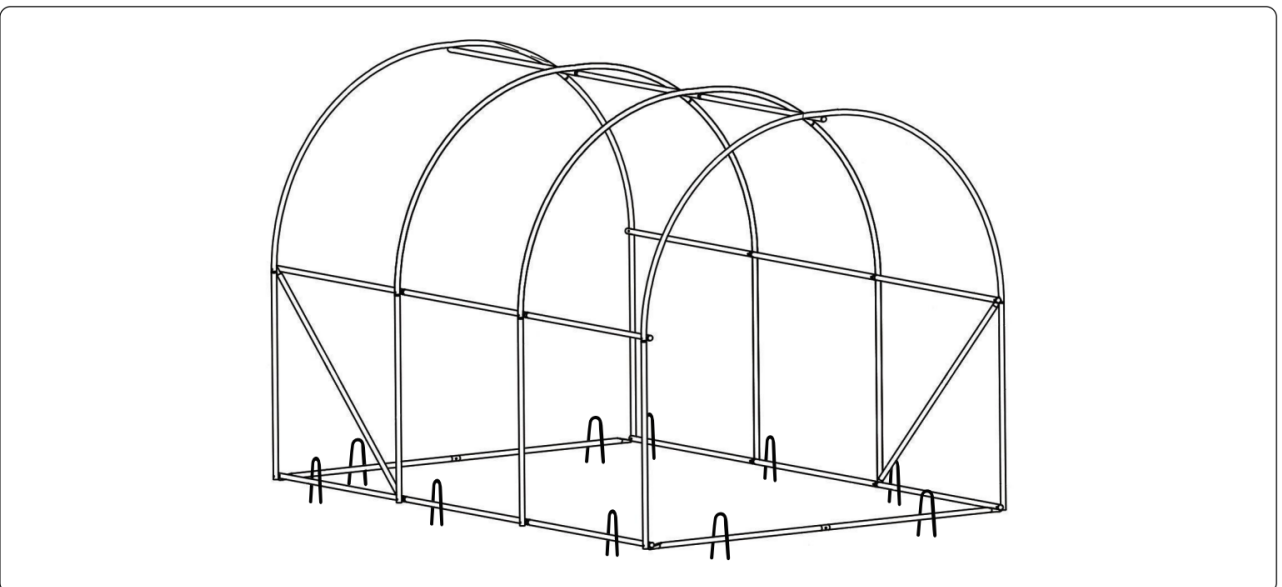

STEP 3

- Note:** ① Please use the rope included in the cover to tie the cover to the frame.
② The ropes and anchors will securely fix the greenhouse to the ground to ensure stability

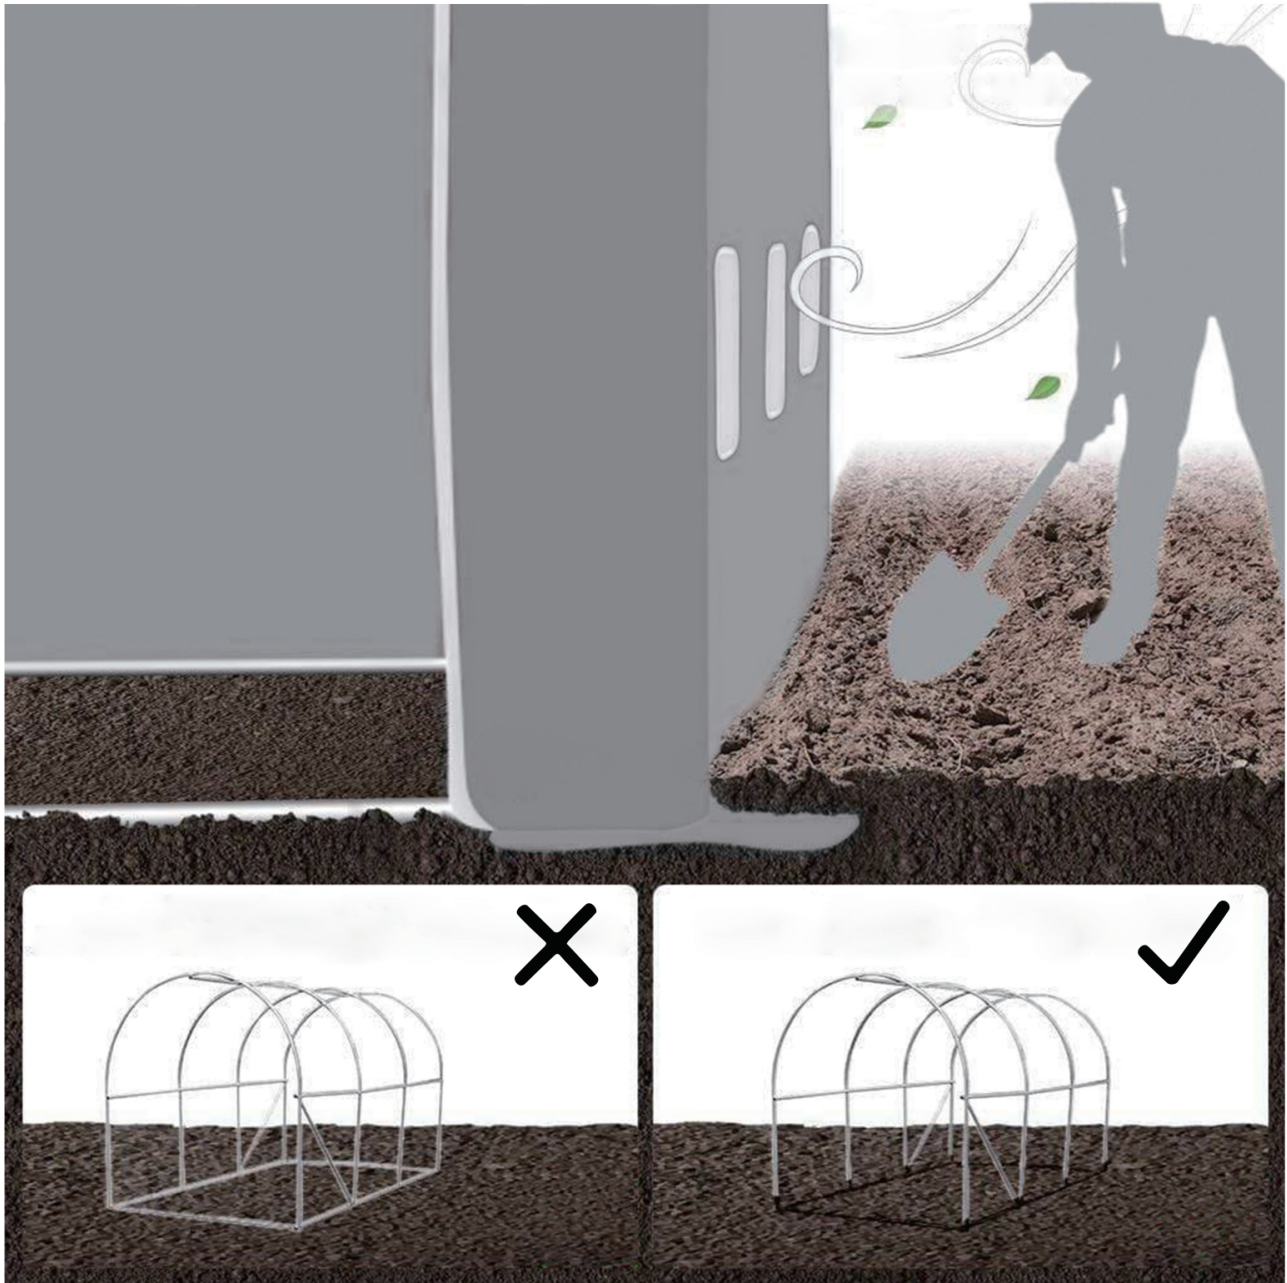

STEP 4

- Note:** Please use the U-Shaped Securing Pegs to fix the frame to the ground.

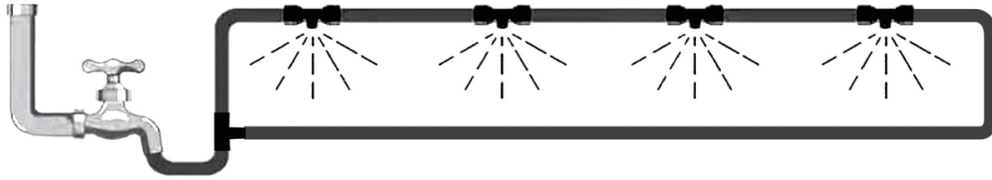

STEP 5

Note: For Maximum stability of your polytunnel, please dig trench to bury base frame poles and back fill covering flaps of plastic canopy.

STEP 6

Greenhouse Micro Drip Irrigation Kit

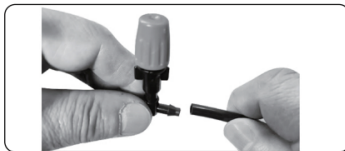

1. Cut out misting line length you need

2. Insert the misting line into the big-T-connector

3. Insert the misting nozzle into the big-T-connector

4. Insert the misting line into the big-T-connector at the other side

5. Insert the misting nozzle into the small-T-connector

6. Insert the misting line into the connector

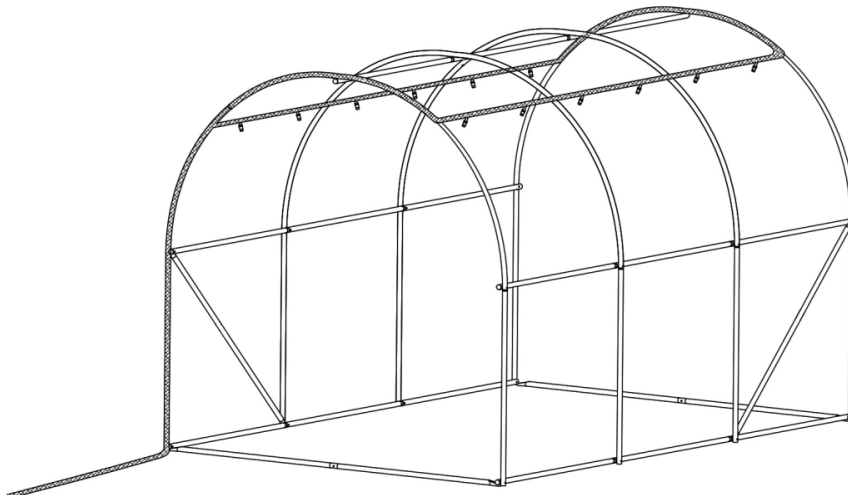

7. Assemble the plastic adapter with the fast connector

8. Assemble the plastic adapter with the water faucet

STEP 7

Note: Please use the zip tie to secure the kit to the greenhouse as needed.
