

HALO LED ICAT REMODEL HOUSING

The H750RICAT is a dedicated LED Remodel housing to be used with designated Halo LED modules. The H750RICAT is designed for remodel applications in insulated ceilings and can be in direct contact with ceiling insulation*. This AIR-TITE™ housing design prevents airflow between conditioned and unconditioned spaces and saves on both heating and air conditioning costs. The LED connector system provides High Efficacy code compliance when used with designated HALO LED modules and trims.

DESIGN FEATURES

Housing

Single wall aluminum housing. Openings are gasketed for AIR-TITE™ installation. Can be used in 2"x 8" joist construction (with 1/2" or 5/8" ceiling material).

Slide-N-Side™ Junction Box

- Seven 1/2" trade size conduit knockouts with true pry-out slots.
- Slide-N-Side™ wire traps allow non-metallic sheathed cable to be installed without tools and without removing knockouts.
- Accepts a wider range of non-metallic sheathed cable - the standard cable types used in lighting for both US and Canada.
 - Allows wiring connections to be made outside the box.
 - Simply insert the cable directly into the trap after connections are made.
 - Accommodates the following standard non-metallic sheathed cable types.
 - (US) #14/2, #14/3, #12/2, #12/3
 - (Canada) #14/2, #14/3, #12/2

Remodel Springs

Four remodel clips secure housing and accommodate 1/2" and 5/8" ceiling material.

LED Module Connection

Halo LED modules simply install with a plug-in 120V-277V rated line voltage wiring connector (UL and CSA Listed Luminaire Disconnect). This non-screw-base connection preserves the high efficacy rating and prevents use of low efficacy incandescent sources.

Caution

Connection is rated for 120V and 277V input. Installer must verify LED module voltage is compatible with the applicable voltage input. If uncertain, consult a qualified electrician.
