### BEFORE YOU START

#### IMPORTANT- RETAIN FOR FUTURE REFERENCE- READ CAREFULLY.

This Kinder Valley Cot conforms to BS EN 716:2008 + A1:2013

**WARNING:** Do not put cot in close proximity to heat sources e.g. open fires, radiators, gas and electric heaters etc.

**WARNING:** Do not use cot if any part is broken, torn or missing and use only spare parts approved by Kinder Valley.

**WARNING:** Do not use more than one mattress.

**WARNING:** Never leave anything in the cot or attached to the sides, that could provide a foothold, or present a danger of suffocation or strangulation e.g. strings, blind/curtain cords etc.

The cot should not be placed too close to other furniture or windows.

All assembly fittings should be tightened properly and checked regularly to ensure that no screws are loose and re-tightened as required. Loose screws or fittings could trap parts of the body, or clothing (e.g. ribbons, drawstrings, necklaces ) this could pose a risk of strangulation.

- We recommend you use a Kinder Valley mattress size 120cm x 60cm. There should never be a gap of more than 3cm between the mattress and sides or ends of the cot.
- The thickness of the mattress used with this cot must not reduce the internal depth (from mattress surface to top of side) to less than 50cm with the base in the lowest position, or 20cm with the base in the highest position.
- The lowest mattress base position is the safest, the base should always be used in that position as soon as the baby is old enough to sit up.
- Use only on firm ground which is on a horizontal level and dry.
- To prevent injury, the cot should not be used as soon as the child is able to climb out of the cot unaided.
- In order to clean, use only a mild detergent and warm water. Do not bleach or use any abrasive substances.
- Fittings should be checked regularly and retightened as necessary.

#### Missing parts

Please check that you have all parts before If you are missing any fixtures and fittings for your product please contact our customer service team on
