Mid-range

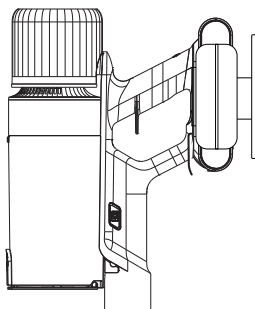

Top grade

CHARGING METHODS

Charging Methods

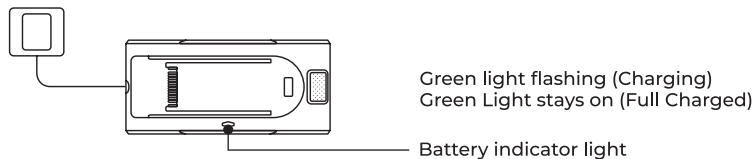

- Method 1:

The product can be charged on the storage wall-mount. The digital screen will display the charging process, and when it reaches 100%, the battery is fully charged.

Method 2:

The battery pack can be pulled out and charged separately. The battery indicator light will flash in green. When the battery is fully charged, the green light will stay on continuously.

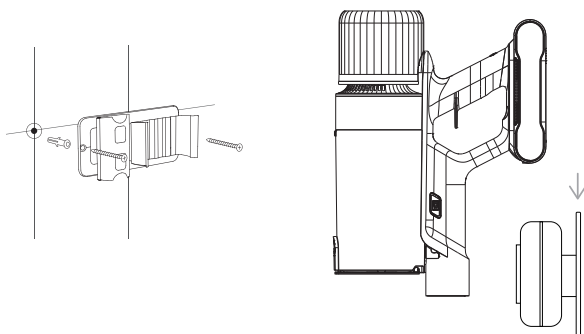

- **Wall Mount**

Hold the wall mount against the wall, aligning it with the two fixing screw holes. Secure it onto the wall using screws, and then hang the vacuum cleaner on the wall.

Warning

Please ensure there are no gas, water, or electrical cables and wires behind the mounting area.

To prevent the mount from dropping down, ensure it is firmly installed.

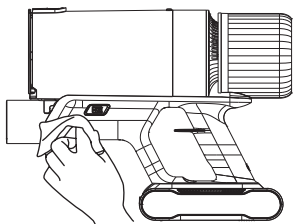

MAINTENANCE

Cleaning regularly will help to extend the service life of the vacuum cleaner.

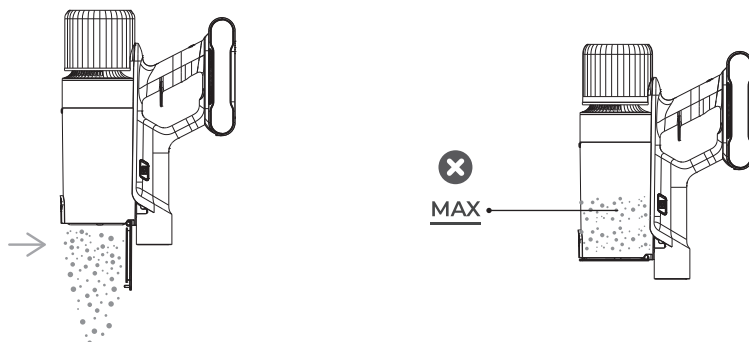

- **Main Body Cleaning**

Turn off the power before cleaning the body. Please use a neutral detergent and wipe the body with a damp cloth. Avoid sun exposure and store in a cool, dry place.

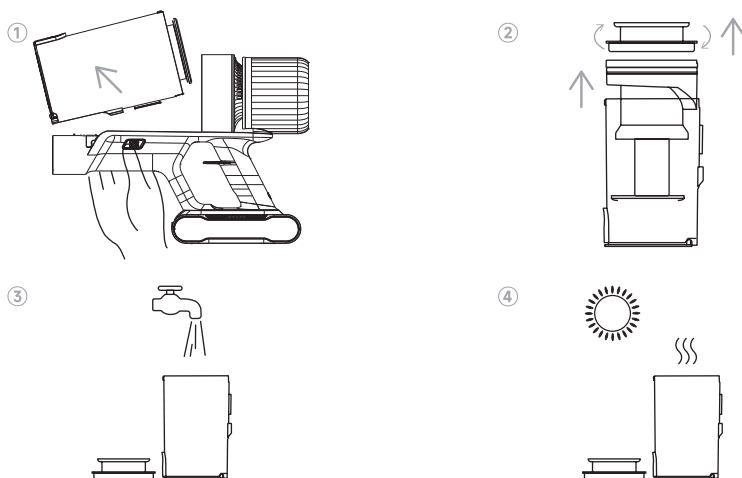

- Empty the Dust Cup

Press the dust cup release button to empty the dust. When in use, if the garbage in the dust cup exceeds the MAX line, please empty it promptly.

- Clean the Filter

Press and hold the dust cup release buttons on the left and right sides of the handle to remove the dust cup.

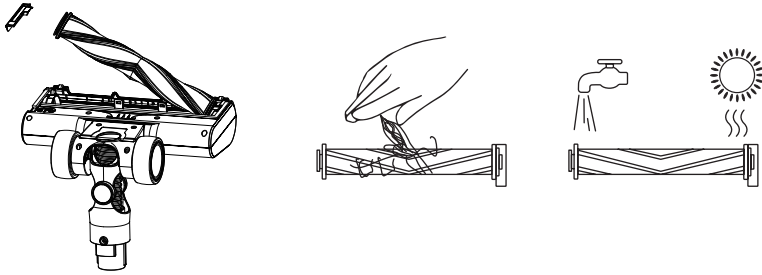

Note: The filter case and HEPA filter should be cleaned every two weeks.

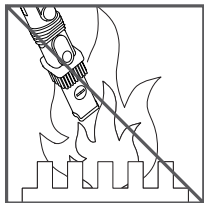

If necessary, replace the HEPA filter every two months. Ensure the filters are completely dry before reassembly.

- Brush Roller Cleaning

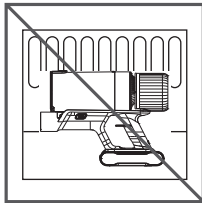

Note: After extended use, bristles may become jammed with hair or similar build-up. It is recommended to clean the brush roller periodically to ensure efficient operation and maintain suction.

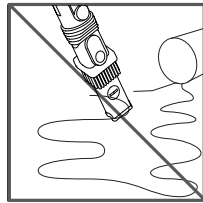

SAFETY INSTRUCTIONS

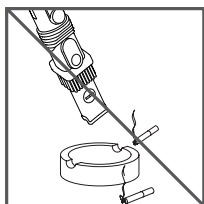

Do not use near
Flame.

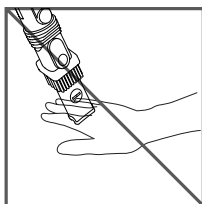

Do not store near
hot surfaces.

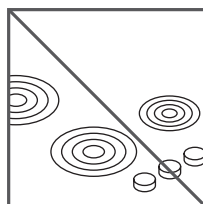

Do not vacuum
water or any liquid.

Do not vacuum
burning objects.

Do not place your
hand near the
vacuum inlet during
