

Assembly Instructions

Carefully unwrap the table base, legs, hardware packet and glass.

Flip the table upside down to attach the legs.

Using a phillips-head screwdriver, attach each leg using the included screws into the pre-drilled holes in each corner of the table. Take care not to overtighten the screws. The table can now be flipped back to an upright position.

If desired, use the included rubber feet on hard surfaces to prevent scratches.

Gently place the glass back on top of the table.
