

Pedestal Desk Instruction Sheet

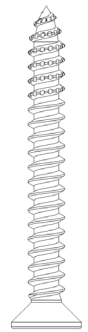

STEPS:

1. (a,b) Let's get your knobs turned around! Reverse the knobs with a Phillips head screwdriver. Unscrew each inward-facing knob and reattach by screwing the knob onto the outside of the unit.
2. (a,b) Get your piece at the height that is best for you by adjusting the levelers. If the levelers are too tight, use pliers to loosen and then adjust by hand. Get the unit in its desired location. Next, adjust the levelers to line up the tops. In order to increase the height, turn them counterclockwise. To lower the height, turn the levelers clockwise.
3. Care for your piece by dusting it with a slightly damp rag. Happy cleaning!

Hardware Provided:

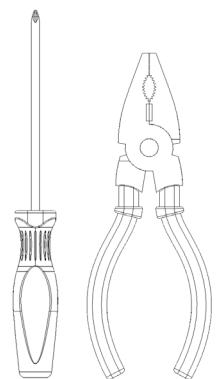

Levelers x 4

1 1/4" Screw x 1

Tools Needed:

Phillips head
screwdriver & pliers
