

veradek — outdoor

shade side table

very easy, very fun
assembly instructions

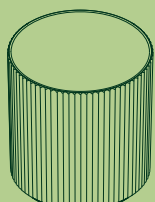

#MYVERADEK | @VERADEK

let's put it together

(you're basically already done)

gather your parts, there should be 12

You will need a 15/16" (24mm) wrench

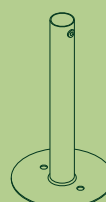

main body

lid/table top

support plate

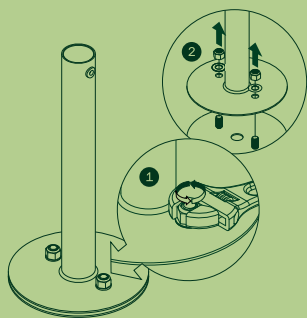

steel stand

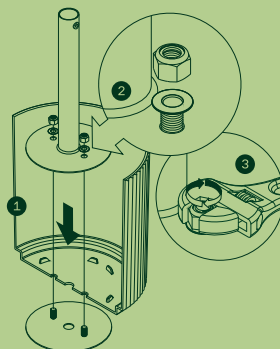

stability sack

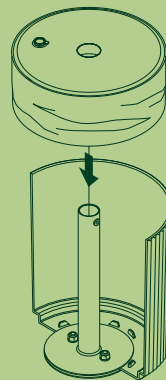

- screw knob
- 1.5" sleeve
- 1.25" sleeve
- lock nut (x2)
- washer (x2)

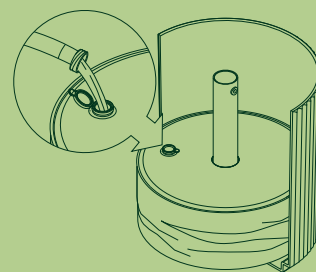

Step 1:
Loosen and separate hardware.

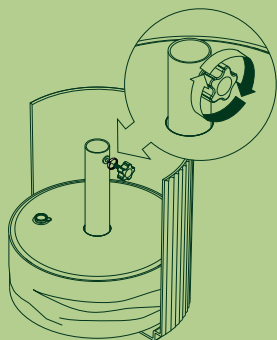

Step 2:
Place the bottom support plate under the main body. Then place the steel stand inside, lining up the holes. Fasten all 3 pieces together using the hardware.

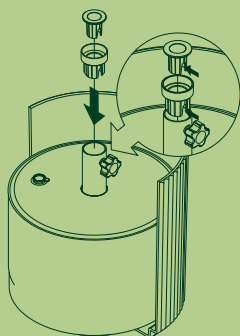

Step 3:
Guide the opening in the center of the stability sack (valve facing up) through the steel stand.

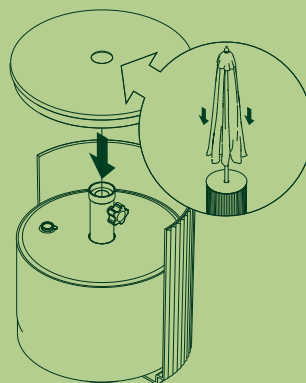

Step 4:
Using a hose or a watering can fill up the stability sack with water.

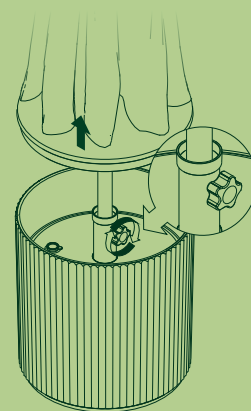

Step 5:
Take your screw knob and twist it into the hole on the steel stand.

Step 6:
Considering your umbrella pole diameter, place one or both sleeves on the top of the steel stand, making sure to align the cutout with the screw knob.

Step 7:
Place your lid onto the table, then place your umbrella through the lid, slotting it into place.

Step 8:
To lock the umbrella into place, lift the lid to adjust the screw knob.
