PURCHASE INFO

**Power ON** - Power your hood on by activating the fan with the Plus(+) or Minus(-) buttons.

**Fan Speeds** - There are 4 speeds available. Press Plus(+) or Minus(-) buttons to adjust to your desired level. The lowest speed is the quietest. The highest speed is the most powerful.

**Automatic Fan Shutoff** - To operate, first ensure that your fan is on. To automatically turn the fan off after a specified time period, press the Auto Shutoff button once.

To adjust the number of minutes, press the plus or minus minutes button(s). The display will indicate the number of minutes remaining until your fan turns off. (For example, if "11" is being displayed, it will be 11 minutes until your fan shuts off.) Programmable up to 15 minutes.

**Light** - Turn on or off lights by pressing the light button.
