

Assembly Instruction

ATTENTION: Do not tighten the screws until you have completed setup assembly.

Product Assembly Accessories:

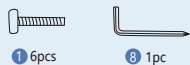

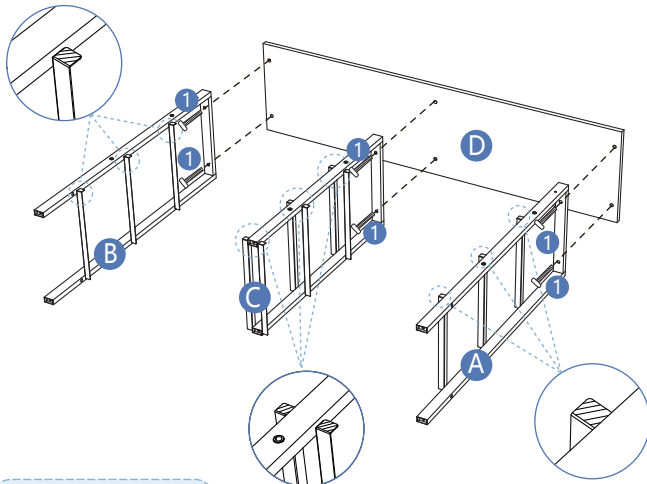

We prepare a spare one for part of the screws in case of damage or loss.

step1:

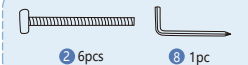

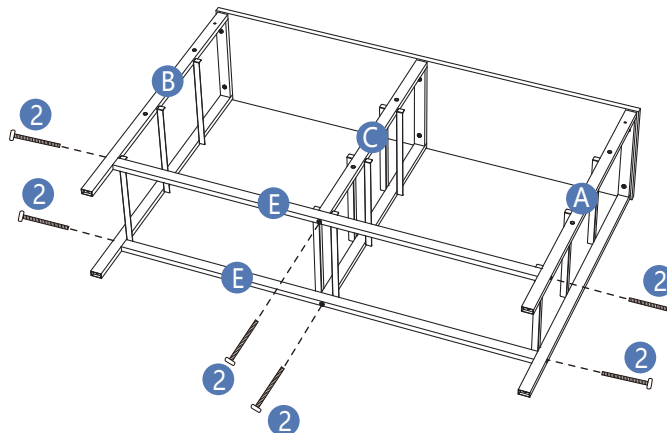

Secure the top board **D** to the frame **A**, **C** and **B** with screw **1**.

Note: The stoppers for the drawers have to be on the same side.

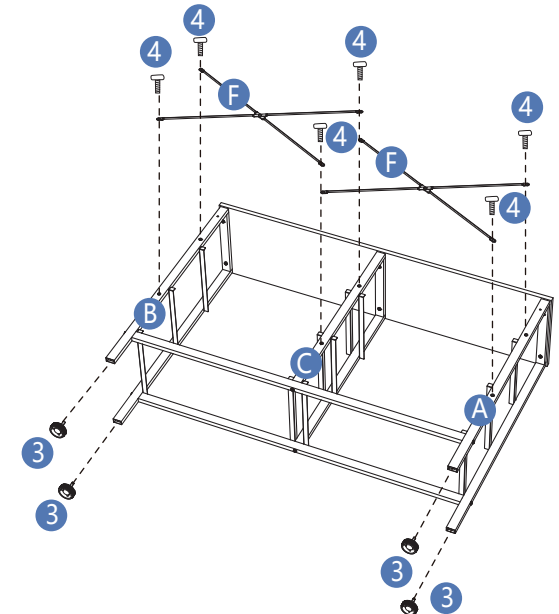

step2:

1. Fix the frame **A** and **B** to the frame **E** with screw **2**.
2. Secure the frame **C** to the frame **E** with screw **2**.

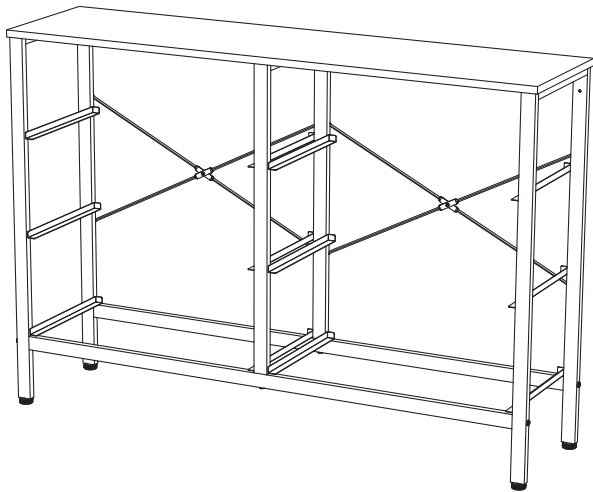

step3:

1. Fix the X-type crossbar **F** to the frame **A**, **C** and **B** with screw **4**.
2. Install the adjustment feet **3**.

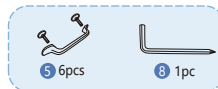

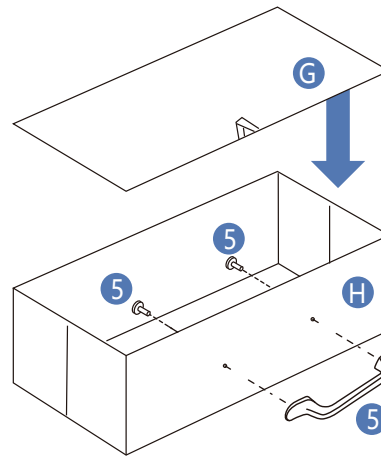

step4:

Make the frame stand up.

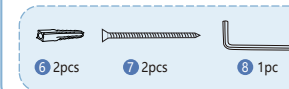

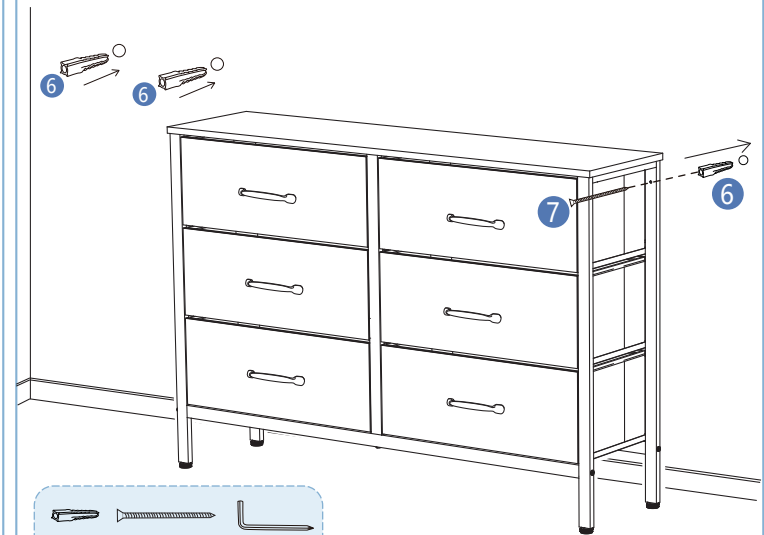

step5:

Install the handle **5** on the drawer **H** and insert the inner pad **G**.

step6:

Use a power drill to make holes in the wall, insert expansion screws **6**, and fix the dresser with screw **7**.

Assembly Notes

- It is recommended that you categorize the accessories before installation to quickly find the required accessories during installation.
- When installing the frame, make sure that the end stoppers of the drawer slots of the three metal frames are in the same direction.

Matters Needing Attention

- Please make sure the weight of the objects you put in the drawers follows the allowed weight standards.
Max static load capacity of the tabletop: 66lb
Max static load capacity of each drawer: 13lb
- Washing the entire dresser can be detrimental to its construction.
Please clean it gently with a wet cloth instead.
- A smell of wood is present on all new products. Please keep the dresser in a well-ventilated room soon after construction so that the odor can leave.
- Secure the dresser to the wall with our provided anti-tip kit to enable stability and protection for your loved ones.
