

四層鍍鉻酒架 使用者手冊

請檢查包裝內容物以確認所有配件都未遺漏。
注意：擱架之間的黑色圓型塑膠蓋，僅作為包裝使用。並非組裝所需零件，可丟棄回收處理。

D 固定套管 - 32個

B 擱架 - 4個

A 桿子 - 4支
調整腳墊 - 4個 (已固定於桿子上)

D

Slip Sleeves - x32

B

Shelf - x4

A

Pole - x4

Feet Leveler - x4 (Screwed into the Pole)

Please inspect box contents to ensure you have received all components.
Note: The black circular plastic tops in between the shelves are used only for packaging purposes. They are NOT NEEDED. Please discard.

WINE RACK USER'S MANUAL

CAUTION: Failure to follow these guidelines may result in property damage or personal injury. Each shelf holds up to (9) 750 mL wine bottle or 200 lbs per shelf on leveling feet.

注意：未遵照這些指示操作會導致財產損失或人身傷害。於安裝調整腳墊後，各層擱架可放置 (9瓶) 750毫升的酒瓶，或可於各層擺放90公斤 (200磅) 的重物。

Step 1
Each POLE (A) has slight horizontal line indentations at 1" intervals. Each SLIP SLEEVE (C) has raised horizontal line inside designed to lock them in place on the POLE. On each POLE, place one pair of the SLIP SLEEVES (C) around each POLE at the desired level. Please make sure the "up" arrow is facing up. Do this for each POLE, and make sure that the heights are identical for each POLE. For safety and stability, the lowest shelf should be lower than the third notch from the bottom.

Slide the pair of SLIP SLEEVES (D) until you hear a click to confirm the pair is locked onto the POLE. DO NOT place more than one pair on each POLE at a time.

Note: There will be a very small gap in between the slip sleeves - this is normal.

Step 2
Slide the shelf (B) from the top of the POLES (A) onto the pairs of SLIP SLEEVES (C). Make sure that the SHELF corner cylinders are positioned over the SLIP SLEEVES.

Step 3
The Feet Levelers are already screwed into your BOTTOM POLES, and you can adjust as needed to ensure your shelving rack is level.

步驟1
每根桿子 (A) 於間隔2.54公分 (1英寸) 之處有細微的水平壓痕。各個固定套管 (C) 內側設計有水平線用來與桿子上的水平壓痕接合。於各個桿子所需的位置放置一對固定套管 (C)。務必確認「向上」的箭頭面朝上。每一根桿子都依相同的步驟組裝，並確認各個桿子的高度一致。為能確保安全和穩固，最底部的擱架高度不應超過底部算起第三個凹槽的位置。

滑動成對的固定套管 (D) 直到聽到卡嗒聲以確認套管與桿子接合固定。同一支桿子請勿同時裝設一對以上的固定套管。

注意：固定套管之間會有非常細微的空隙 - 此為正常現象。

步驟2
將擱架 (B) 由桿子 (A) 的頂端滑動至成對的固定套管 (C) 上端。確認擱架的角形圓柱固定於固定套管上。

步驟3
調整腳墊已預先安裝於桿子底部。您可依所需自行調整以確保架子的平穩。
