

Component description and confirmation

Precautions before installation

- When assembling the product, keep away from children and pets as far as possible to prevent unforeseen accidents.
- Due to the assembly needs of this product, two people should work together as much as possible.

Specific installation methods and steps

Step 1: place the base first

Step 2: first install the front door of the first floor, as shown in the figure

Clamp the bottom of the door in the base slot

Step 3: install the side mesh and pay attention to align with the transverse iron wire of the front door

Double row buckle fixing method

Step 4: install the rear mesh. The principle is the same as above. The rear and side pieces need to be fixed with double rows of buckles

Fix it with double row buckles

Step 5: install the mesh on the other side and assemble the upper and lower snaps

Superimposed buckle fixation

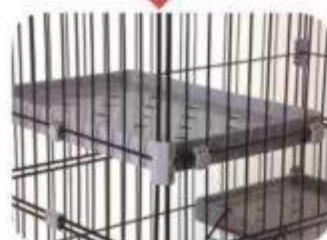

Step 6: the assembly principle of the four nets on the upper layer is the same as that on the same layer

Step 7: install the top layer mesh

Step 8: assemble the floor and adjust the floor height according to the demand.

Floor assembly method

Snap pin assembly method
