RINA RHINOCEROS

DESIGNED BY STEFFEN JUUL

ENGLISH

Rina captures the nature of rhinos in a simple and lovable sculpture made from solid oak. With the deep black eyes, Rina has a vivid look. The expression of the rhinoceros can change as the head can be tilted to either side giving Rina a charming and wondering look on its face. On its own or together with its family, Rina will bring enjoyment to any room it enters. Rina builds upon an old tradition among Danish architects and designers to make expressive wooden sculptures.

Designed by Steffen Juul

A graduate from the Danish Design School. Since 1996, he has been running his own studio with great attention to create interaction between the design and the user. With a drive to create timeless designs, Steffen Juul focuses on the attractiveness of a design to establish a feeling of love and joy.

DANISH

Det charmerende næsehorn er et moderne trædyr designet til at fremkalde det store afrikanske dyrs væsen i en buttede krop, som med sine dybe, sorte øjne får et udtryksfuldt ansigt. Rina udtryk kan ændres ved at dreje hovedet let på skrå, som giver dem et undrende og charmerende blik. Alene eller sammen er de en stemningsfuld dekoration hvad enten der er i stuen, på kontoret eller børneværelset.

Rina bygger videre på en gammel tradition blandt danske arkitekter og designere ved at skabe udtryksfulde trædyr. Dyrene er fremstillet i massivt egetræ, som giver de afrikanske dyr et lyst, nordisk og tidløst præg.
