Troubleshooting

Problem	Possible Cause	Solution
The umbrella can't close.	The top of the umbrella is in a tilted position.	Adjust the umbrella top to the upright position and then close the umbrella.
The crank does not click and the canopy does not move up when turning the crank handle in the open direction.	The rope is loose and needs to be wound around the crankshaft and stretched.	Keep turning the crank handle in the open direction several turns to wind and stretch the rope until the canopy moves up.
The crank becomes too hard to work.	The rope has come off the pulley.	Slack the rope and put it back onto the pulley.

CAUTION

Please pull and loosen the umbrella ribs by hand, so they're not entangled, before attempting to open the umbrella by crank.

The diagram illustrates the three steps of the tilt mechanism usage. It shows a hand pressing a button on the shaft, the canopy tilting upwards, and the button locking into place with a 'click' sound.

Tilt Mechanism Usage:

1. Locate the lock button and gently press it to unlock the umbrella canopy.
2. Tilt the umbrella canopy to your desired position.
3. Release the button and continue to tilt until you are satisfied; the button will automatically lock.
