

RAIN BARREL ASSEMBLY INSTRUCTIONS

OPTIONAL

The top of your Rain Barrel has a guideline that you can follow to allow you to put your drain spout into your barrel to maximize your water conservation efforts.

Use a heavy-duty utility knife or jigsaw to cut out.

Please wear protective equipment when cutting.

Utility knife
or Skill saw

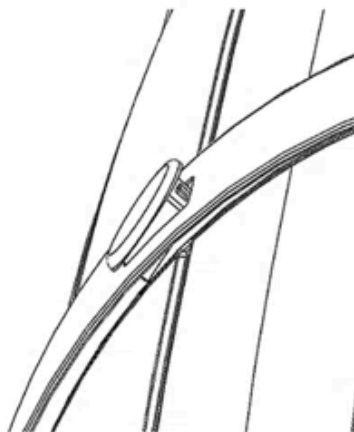

Work Gloves

Safety Glasses

CLIP REMOVAL

To remove clips either use your fingers to compress the sides of the clips from behind the barrel lip after installation or use a screwdriver to help remove clips.
