## Assemble steps

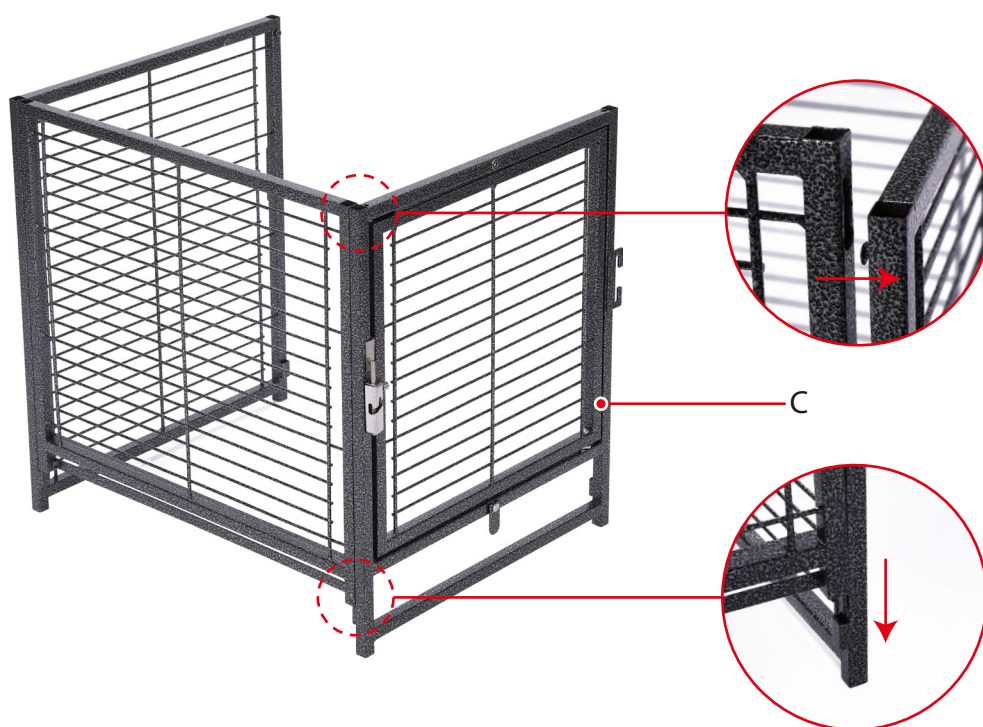

### Step 1

Connect Part A with Part B and make sure that all the holes align.

### Step 2

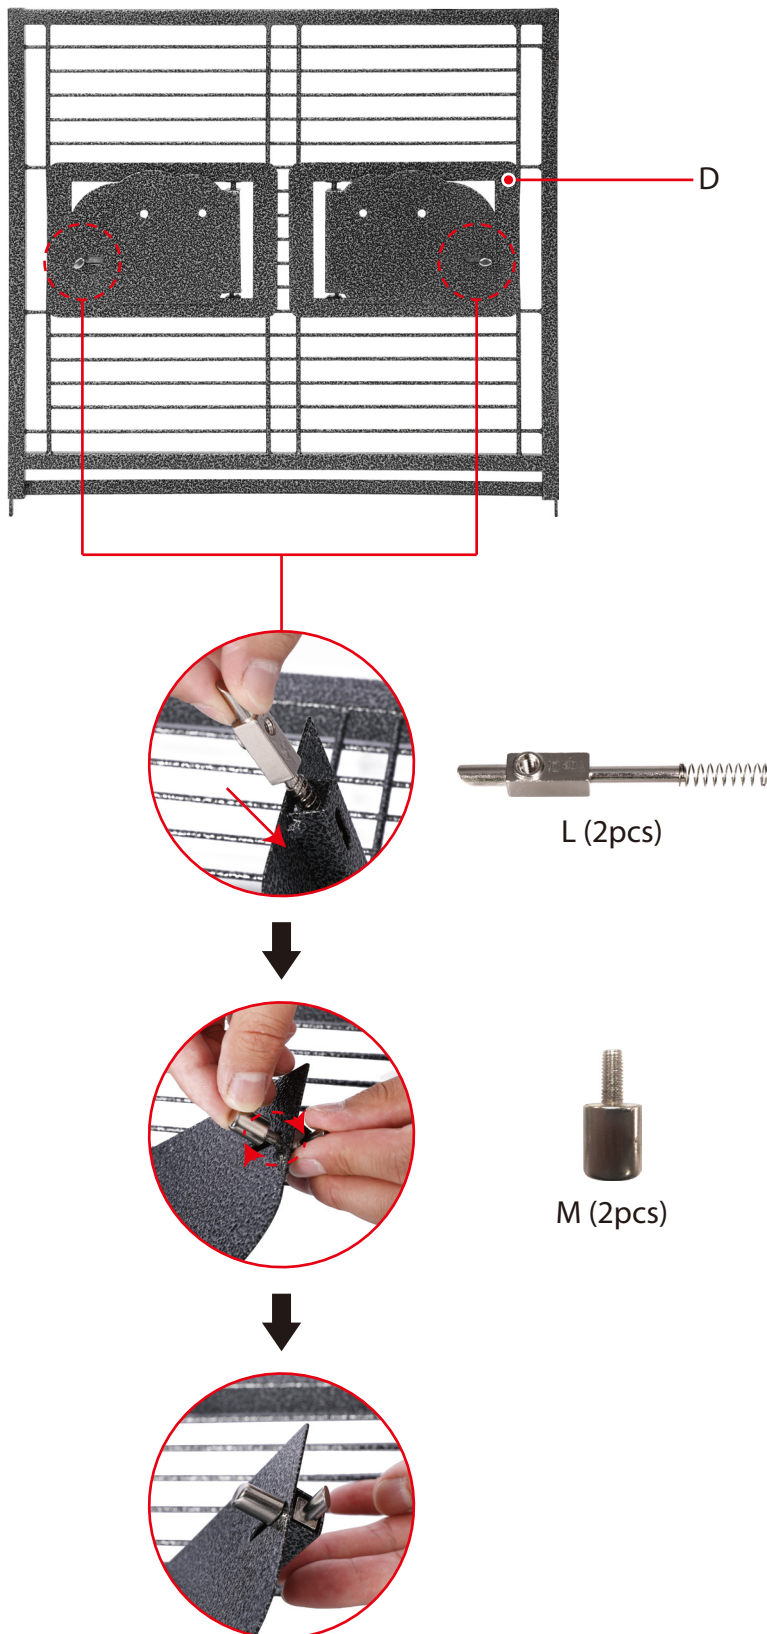

Connect Part C with Part B from the lock side and make sure that all the holes align.

## Assemble steps

### Step 3

Install the spring on the long end of Part L and then install Part L into the hole of Part D. Make sure that the screw hole faces the outside. Install Part M on the screw hole of Part L and tighten up by screwing clockwise. Repeat the above steps on the symmetric position.

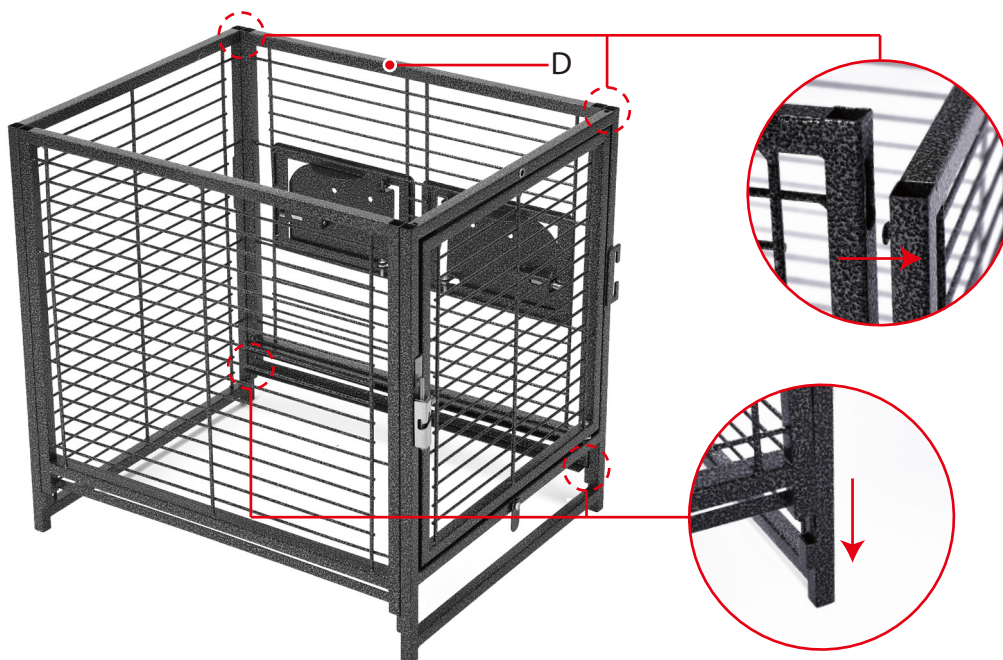

## Assemble steps

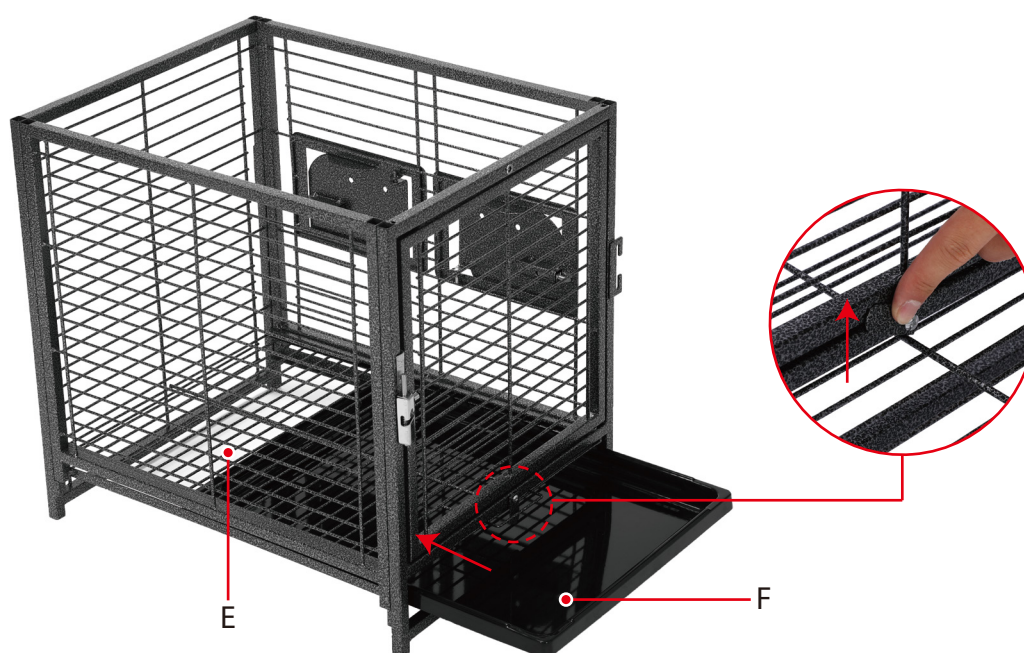

### Step 4

Connect Part D with Part A and C. Make sure that all the holes align and the lock side face the outside.

### Step 5

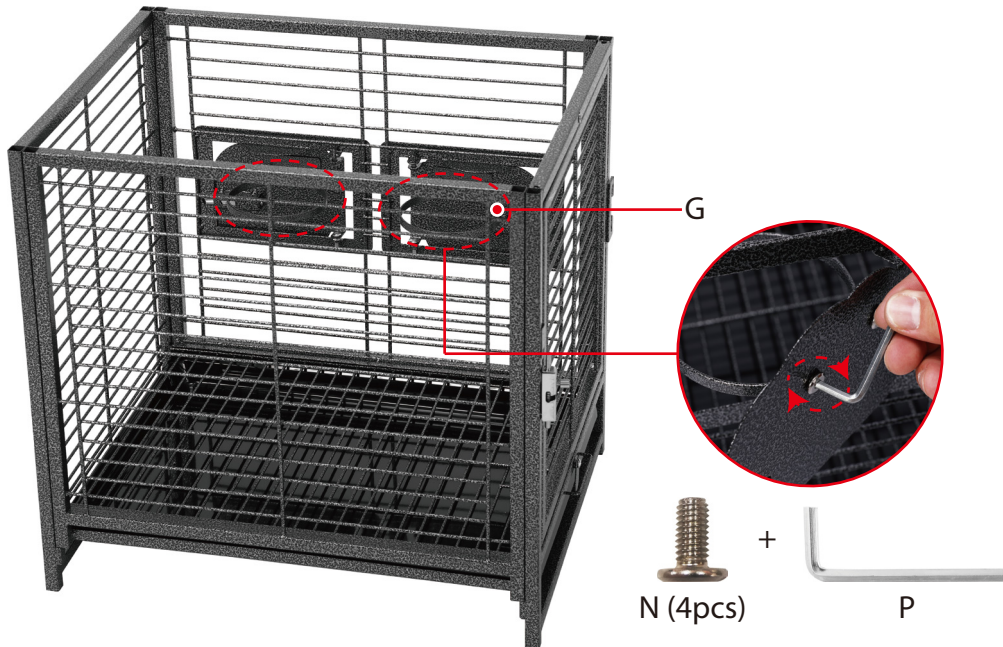

Push Part E into the carrier from the bottom of Part B, and push Part F into the carrier under Part E. Note: you need to move the blocker upward to ensure Part E and Part F will be pushed inside smoothly.

## Assemble steps

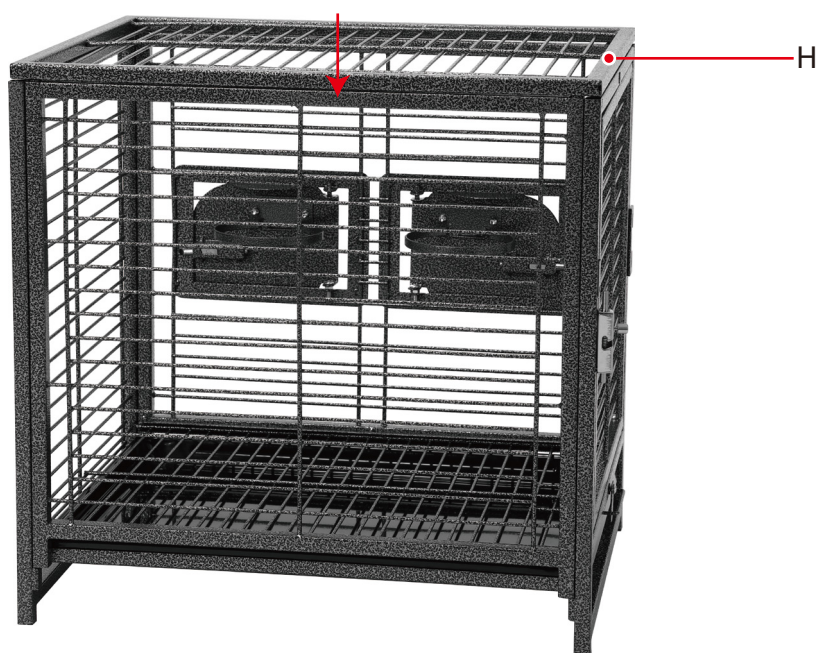

### Step 6

Install Part G (2 pcs) on the exact position of Part D and use screws to tighten up by screwing them clockwise.

### Step 7

Install Part H on the top of the carrier.

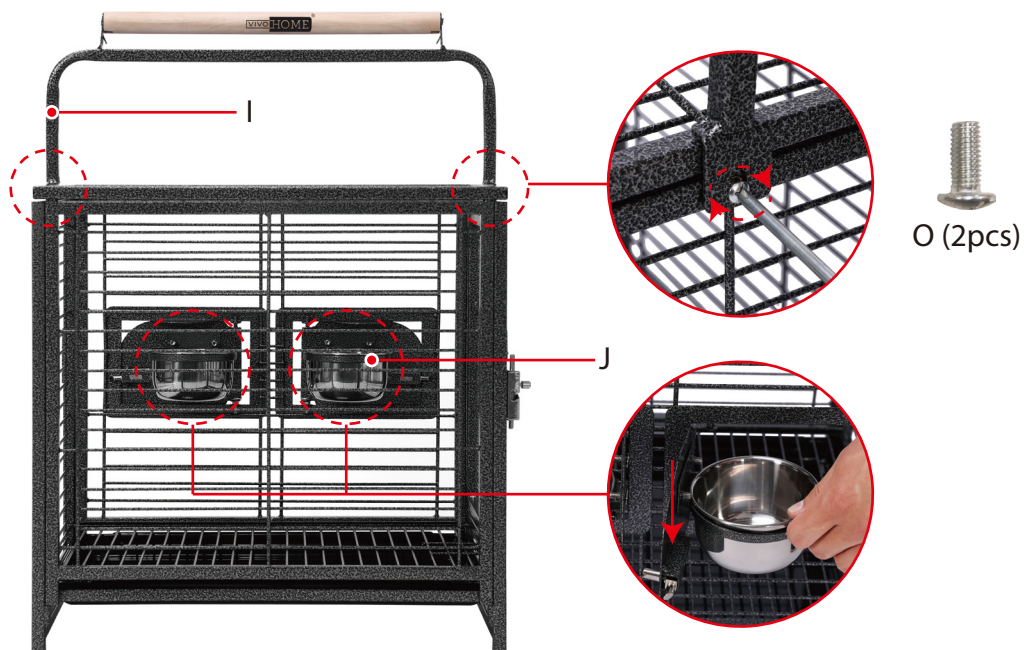

## Assemble steps

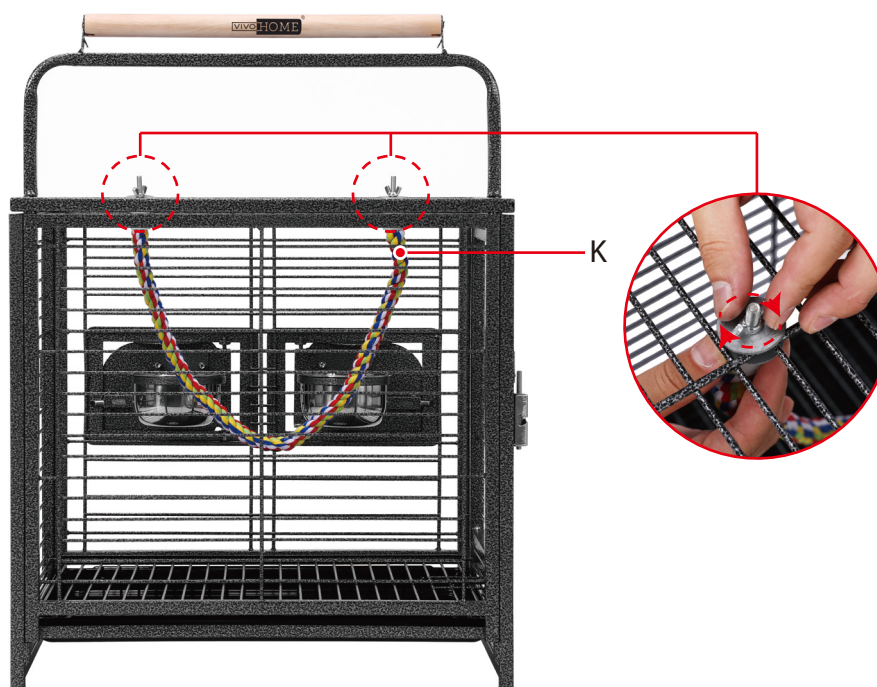

### Step 8

Install Part I on the exact position of Part H and use Screw O to tighten up by screwing them clockwise. Put Part J into the circle on Part D.

### Step 9

Put Part K inside the cage and fasten its two ends to Part H. Use screws to tighten up.
