When installing, this hole faces outward

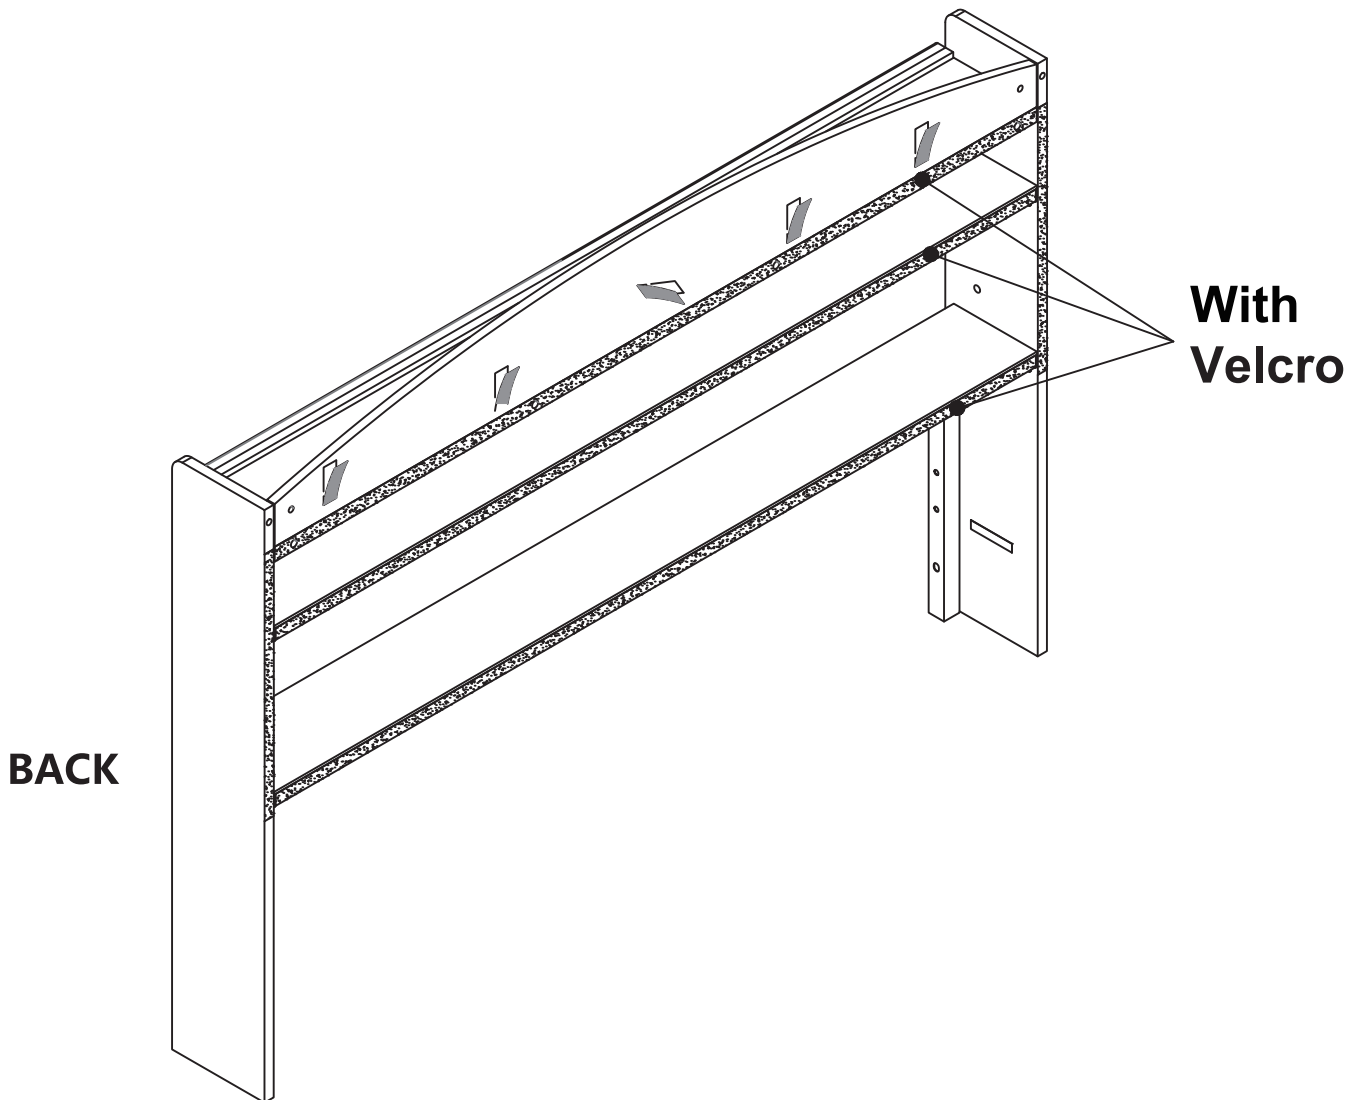

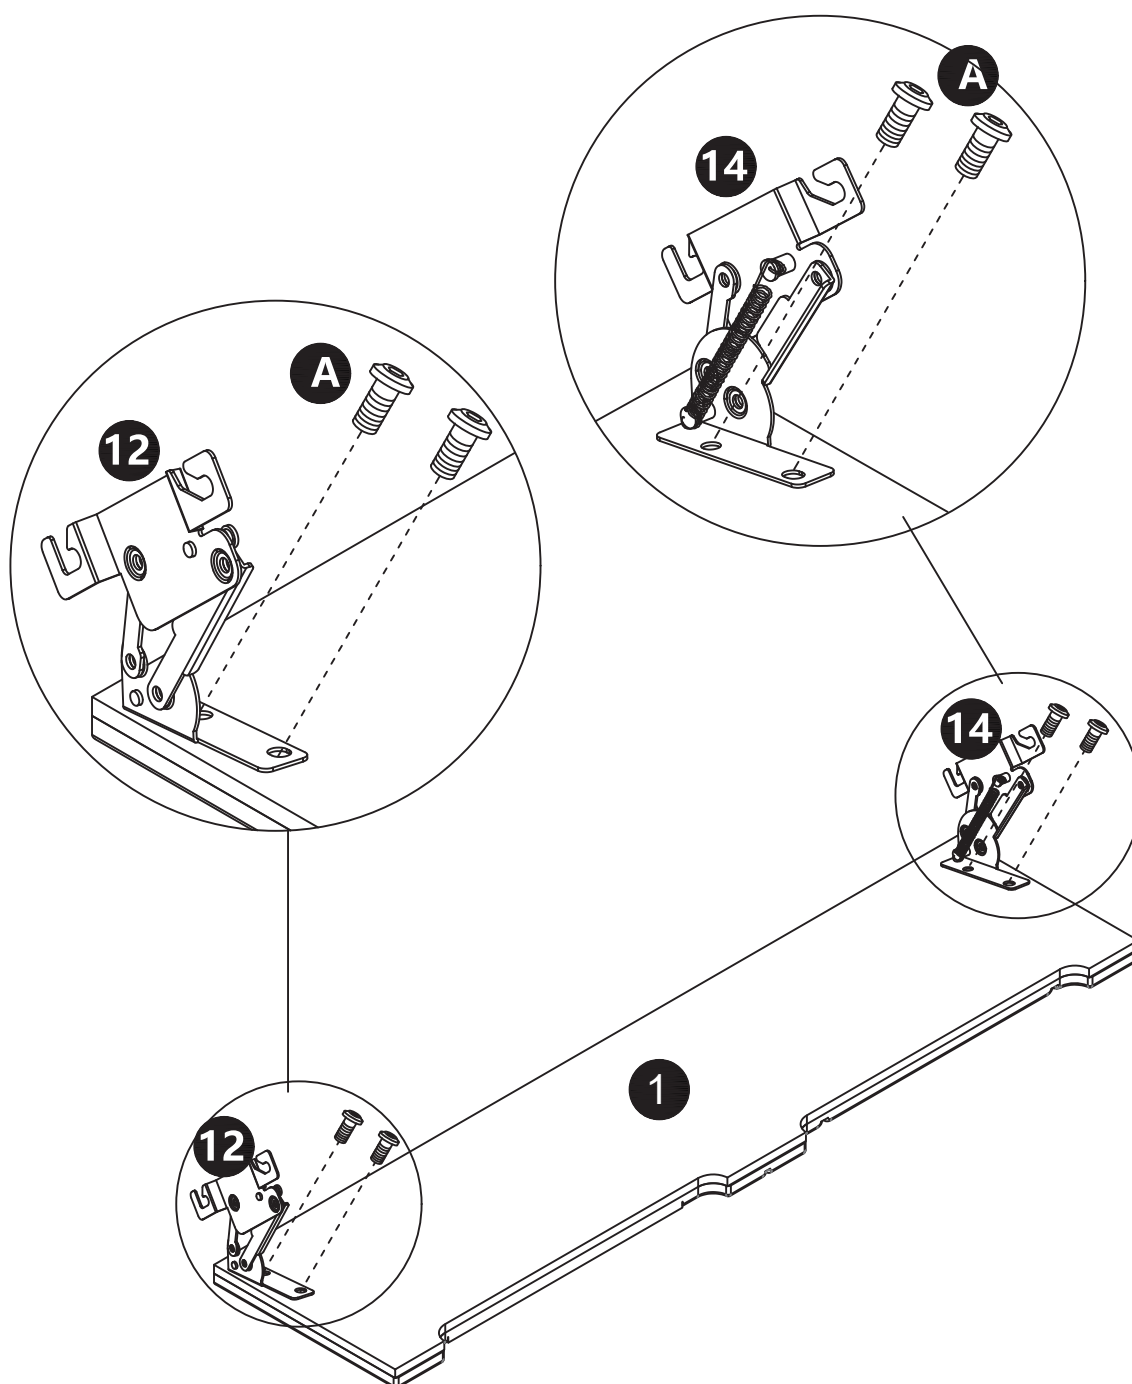

First, tighten the screw (B) and leave a **3-5mm** distance to prevent it from tightening. Then, clip the accessory (28), (28), (30) into the screw from bottom to top in sequence. After the accessory is fastened, the screw must be tightened tightly

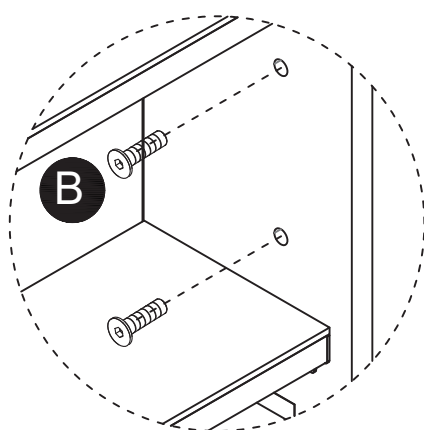

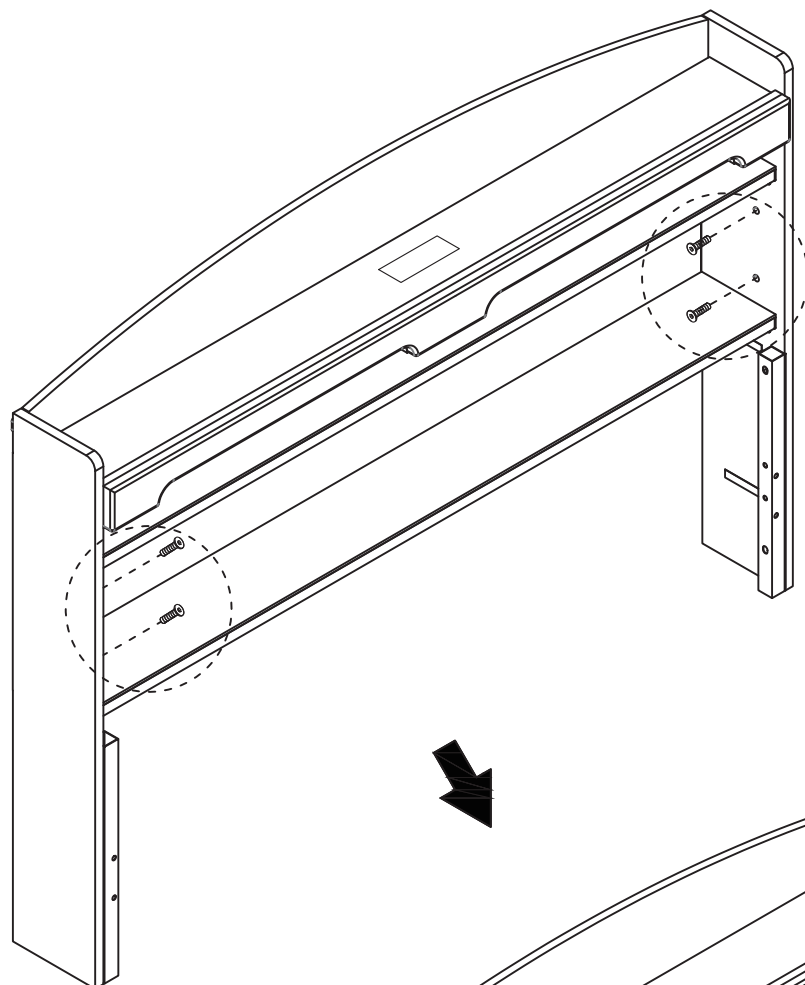

In **step 1**, the installed corner horse (34) should be locked with the side wing (3), (7), and locking on the back is more convenient

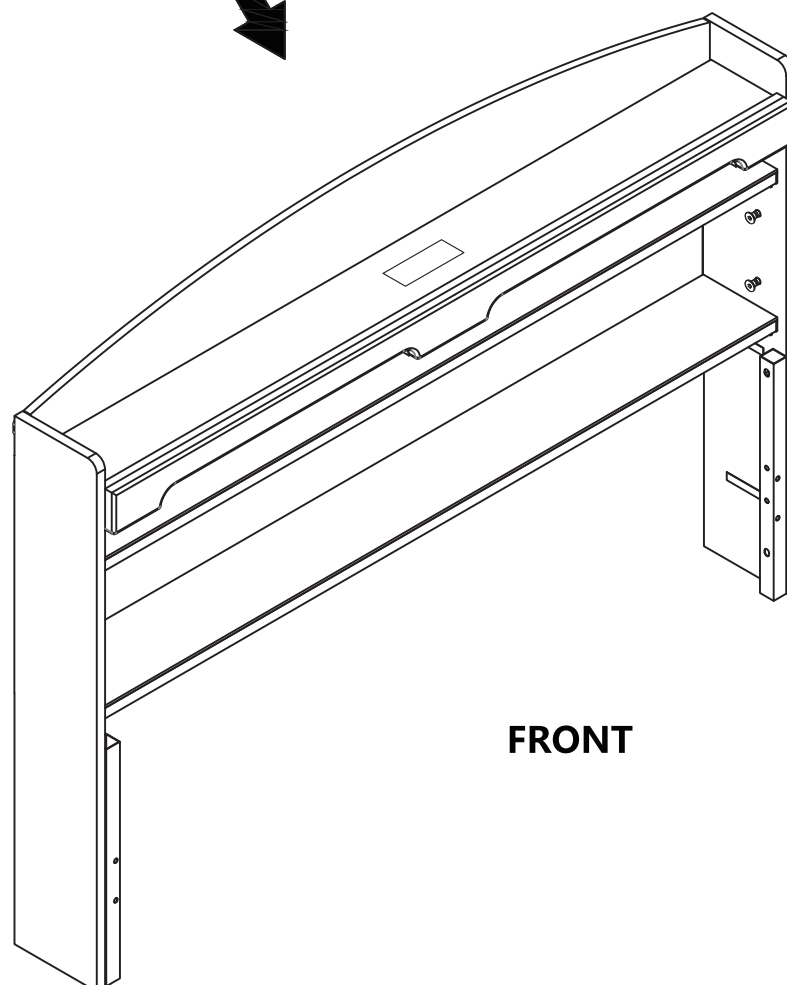

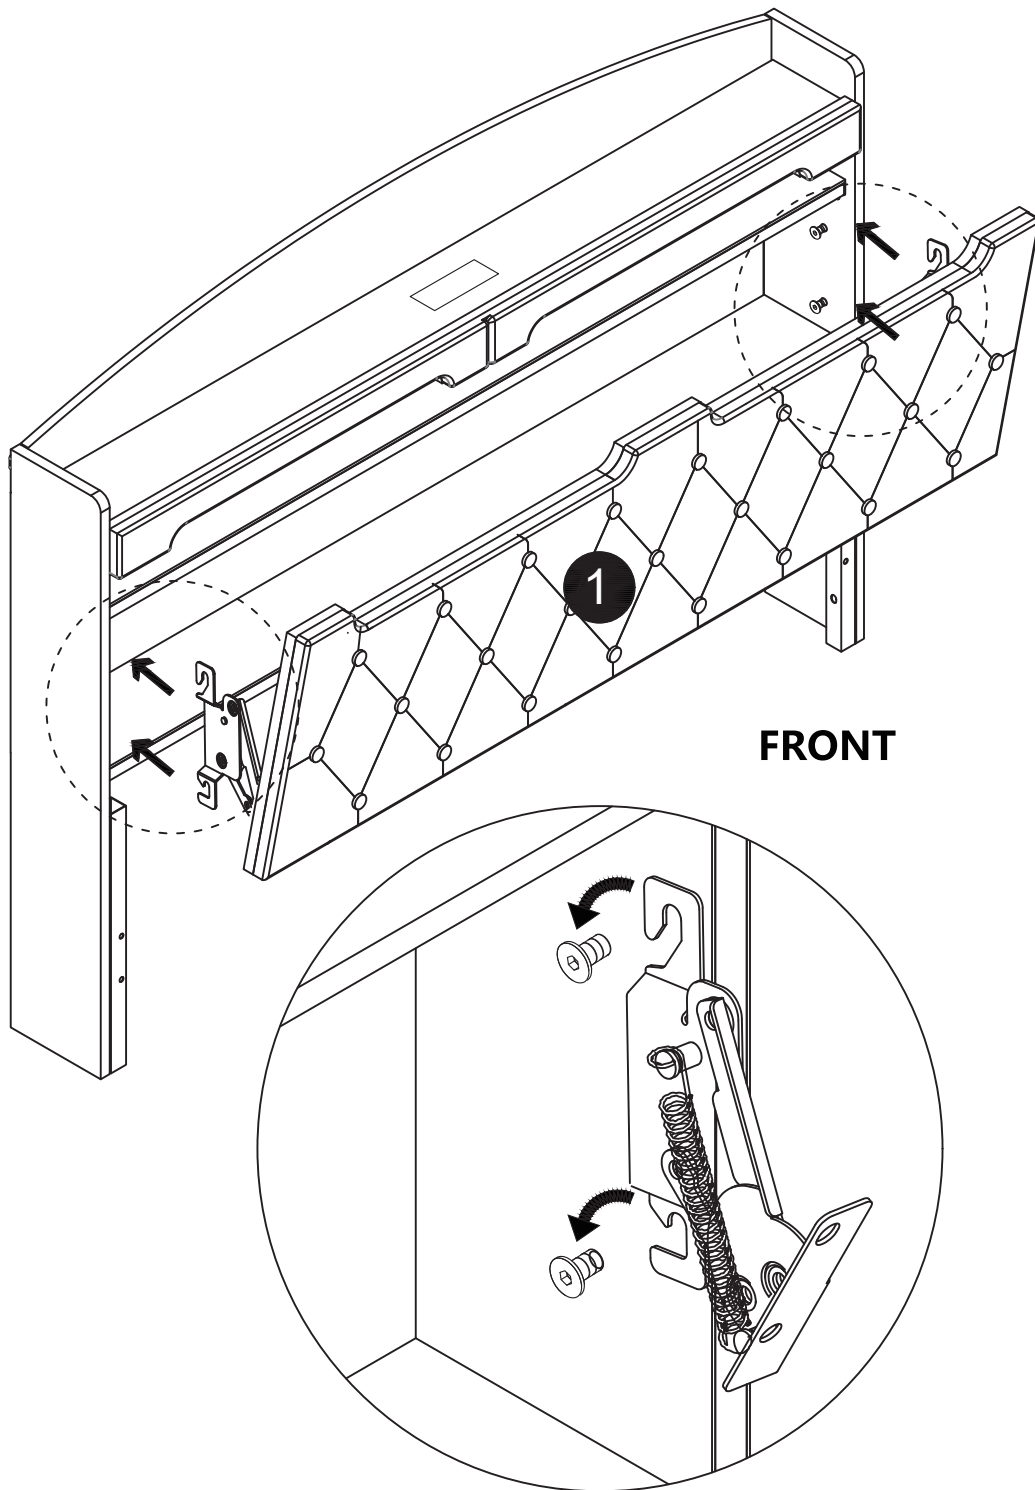

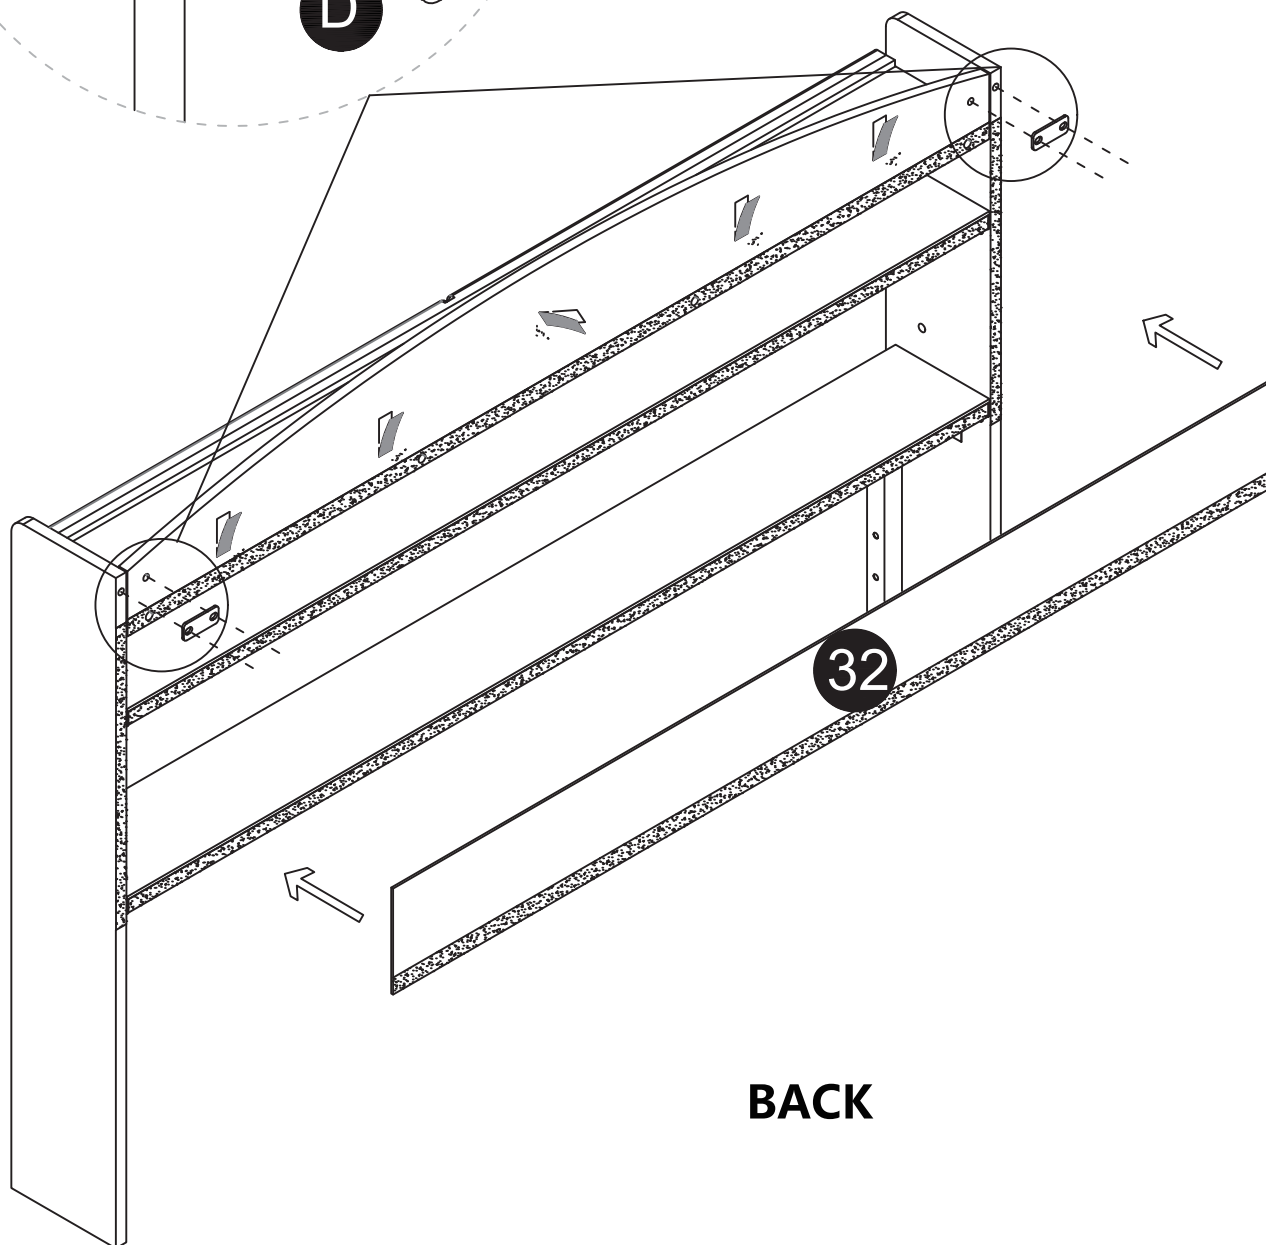

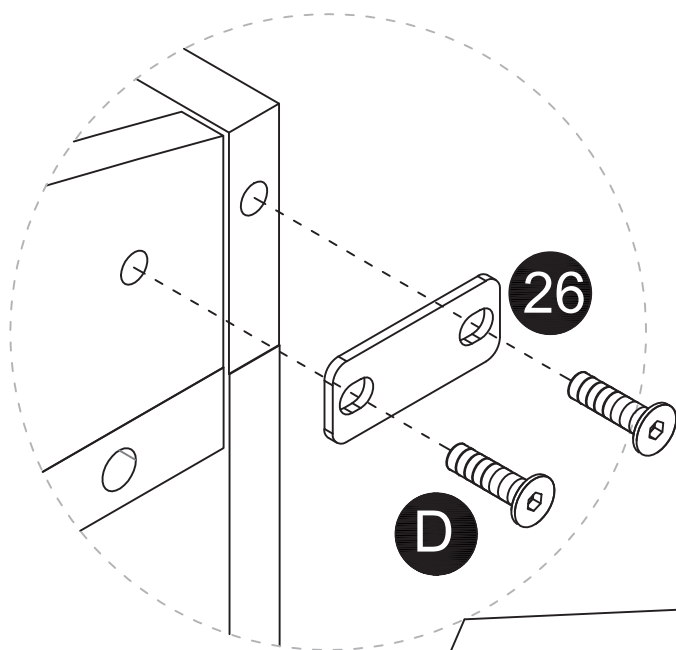

Lock first but do
not tighten

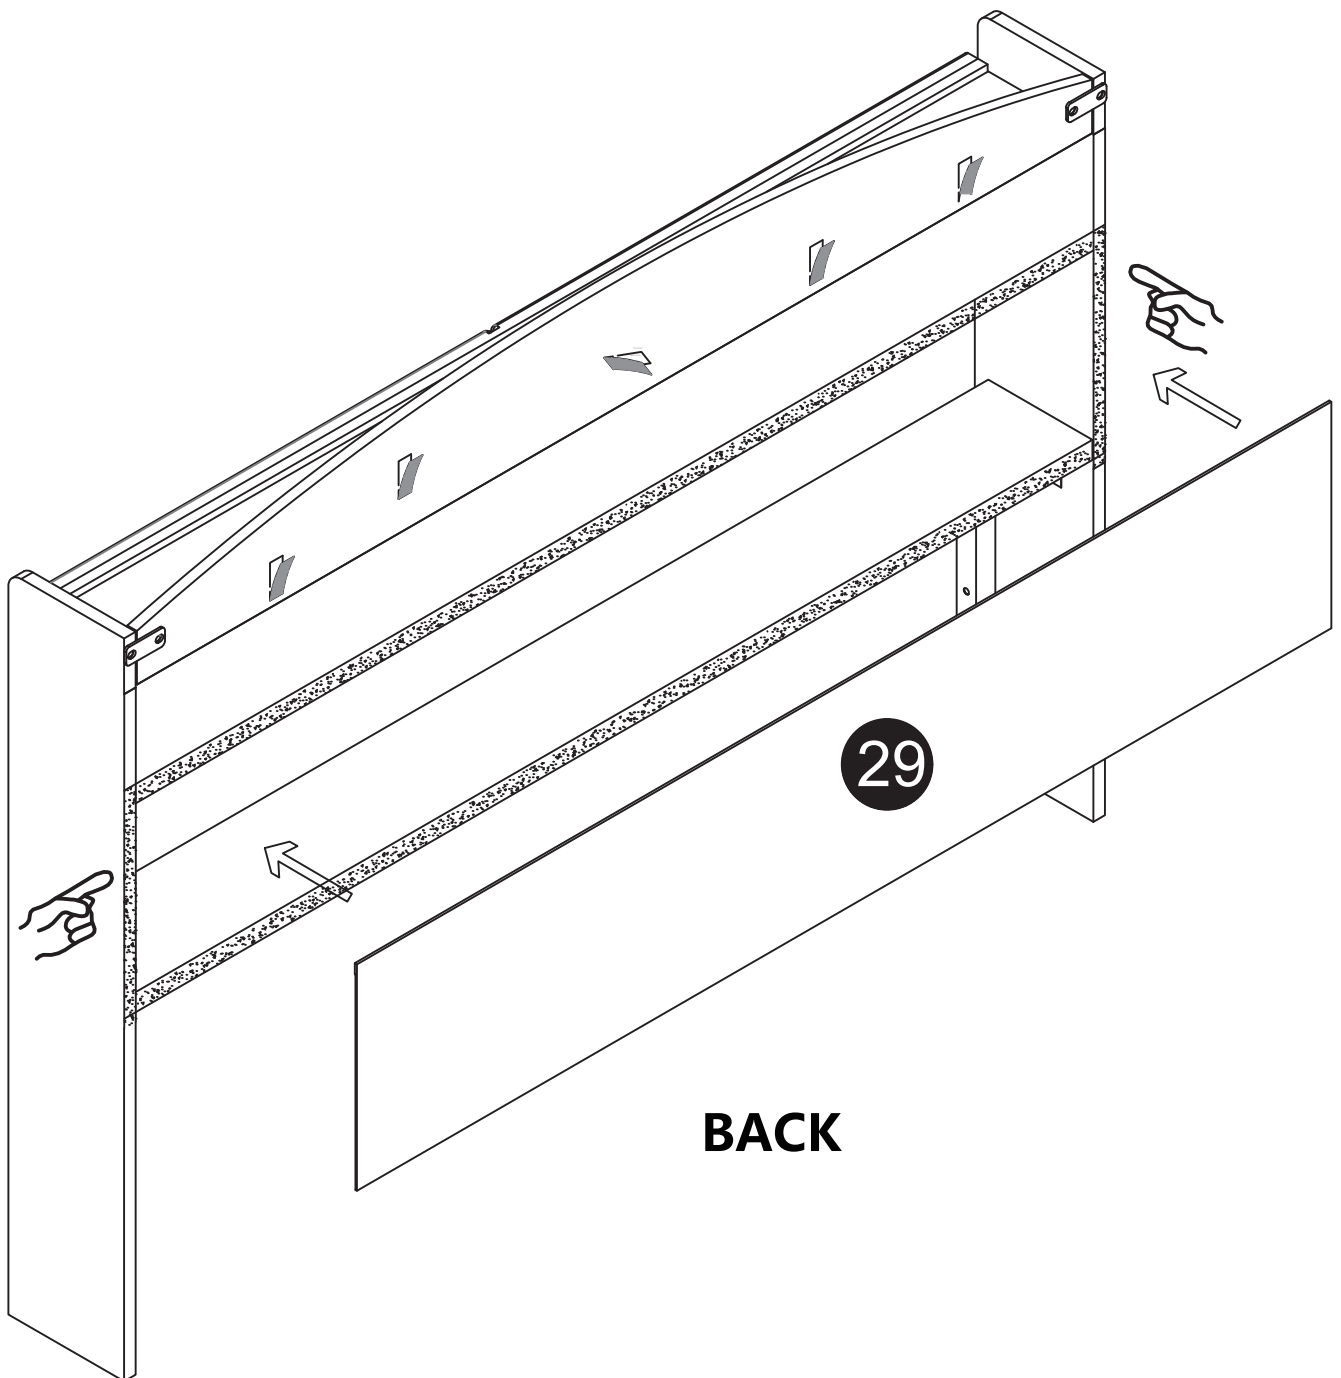

FRONT

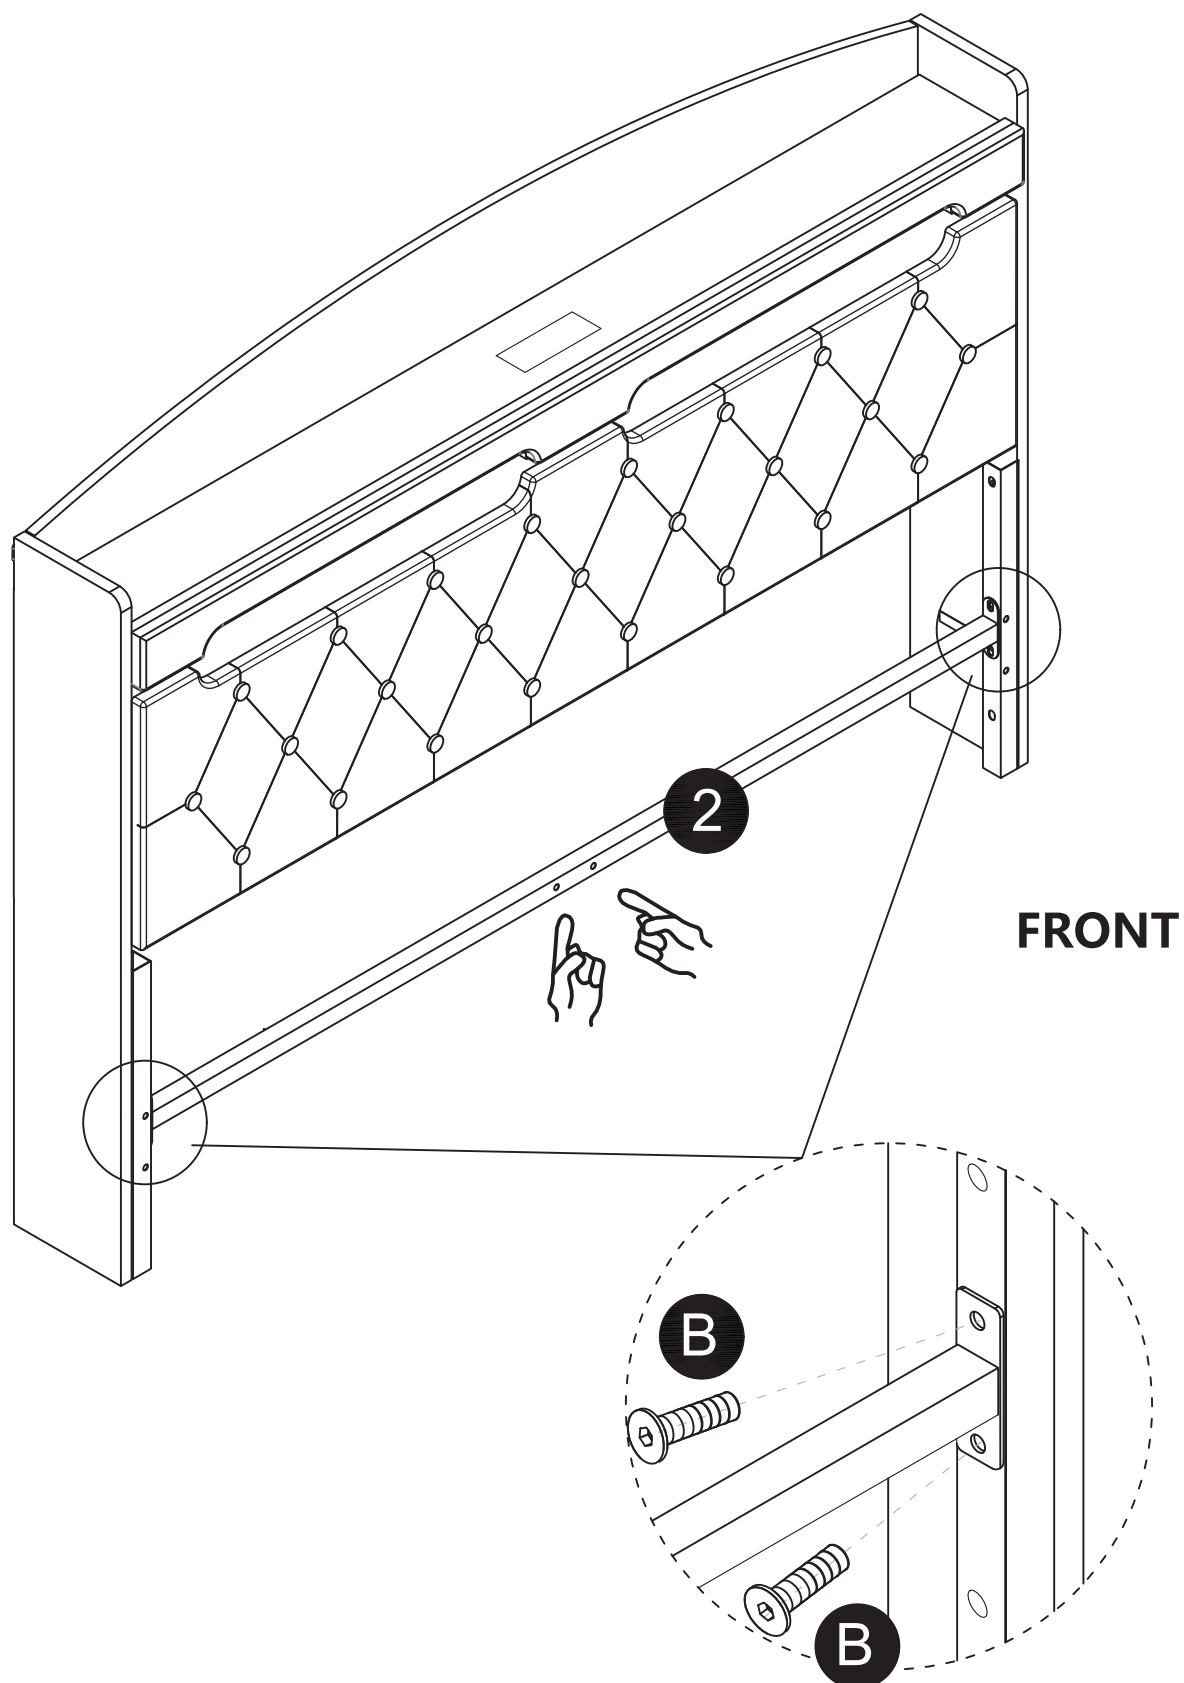

**After hanging it,
tighten the screws.**
