SOLAR POST LIGHT

Precautions:

1. Make sure the switch is ON before using, or the solar post lights won't light or charge , charging the solar lights at least 10 hours to get fully charged before first use.
2. Press the switch to turn On/Off the solar lights. And press the 3CCT switch to choose lighting modes.
3. Please remove the transparent protective film on the solar panel, this will allow the solar panel to receive more sunlight.
4. Locate the solar post lights without shade from trees, or other environments that block sunlight.
5. In cloudy weather or winter, charging time may be longer and working time may be shorter. This is a common feature of solar powered lights and should not be considered as quality problem.
6. Please always keep the solar lights distant from other night light sources to keep lighting.
7. Please keep the solar panel clean and put it directly in the sun to get enough solar energy to charge.
8. When cleaning the lamp, use a soft, dry cotton cloth to avoid scratching the surface.
9. Avoid using abrasive or corrosive cleaners on the lamp's surface to prevent damage or corrosion.
10. Do not dispose of the product and batteries in fire. When the product or batteries are disposed of in fire, the heat build-up may cause explosion.
11. Do not dispose of the product with household waste. Please dispose of electronic products in accordance with local regulations.
