

PATIO UMBRELLA

Set-up Instructions

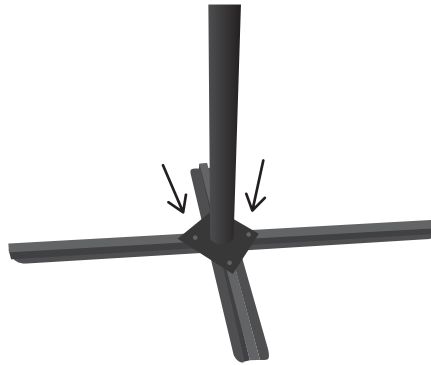

Trademark Innovations

STEP 1

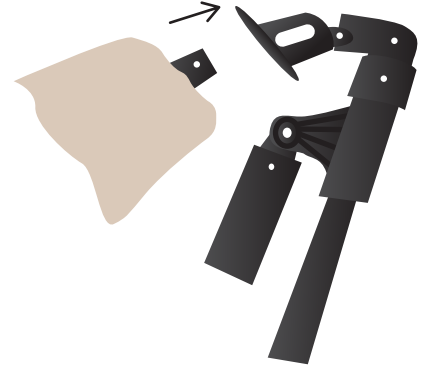

Lay out the two pieces of the umbrella base on the ground.

STEP 2

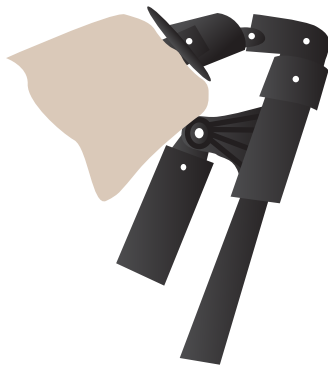

Using a 9/16 wrench and the bolts included, bolt the main umbrella support post to the base.

STEP 3

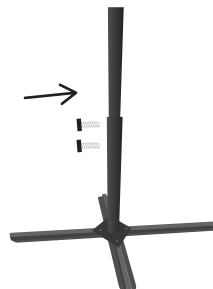

Lay the umbrella flat so that the canopy piece can be fastened to the upright arm.

STEP 4

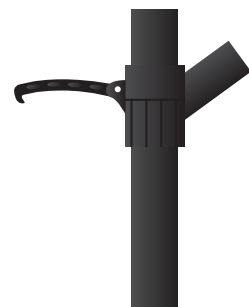

Hold the 2 clips together and fasten the canopy piece to the upright arm.

STEP 5

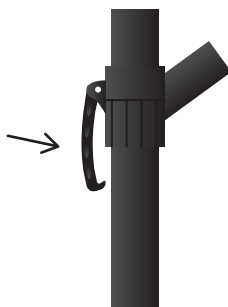

Line up the pegs on the upright arm with the slots on the main umbrella support post, and secure the upright arm to the support post using the screws provided.

STEP 6

Release the safety handle so that the umbrella is ready to open.

STEP 7

After placing the umbrella in the desired position, slide the black cap down and lock the safety handle.

STEP 8

Turn the crank handle to open or close the umbrella.

WARNING:

- Do not use around young children ages 8 or below
- Keep away from fire sources, including candles, fire pits, grills, and any product with an open or closed flame, or heat source
- Check before each and every use to ensure all the parts and materials are in good condition
- Do not leave the umbrella up in heavy winds or while not in use
- Secure base with sand bags or blocks – 110lbs

Base needs to be secured with patio blocks or sandbags (NOT INCLUDED)
