To improve the wind resistance, please be sure to complete this installation step. If expansion bolts or ground stakes are not installed, strong winds may cause the tool shed to collapse. Expansion bolts are crucial for the stability on concrete surfaces, and ground stakes are used for grassy areas. The accessory package includes the ground stake components, but the expansion bolts are not included.

The screws of the M6X50 must be hit at the joint of the floor beam to make it stronger.
