Allen Key x 1 |

Screw x 1

Shower Hose x 1 Washer x 2

3-Way Diverter x 1

Teflon Tape x 1

Wrap Taflon tape clockwise a few rounds to cover the showerarm threads.

- For CA residents or customers who wish to conserve more water

1.8gpm Water Regulator (Red) x 2

3 Attach 3-way diverter to the shower arm by rotating hex nut clockwise by hand.

Cover the hex nut with a cloth to avoid scratch.

Lightly snug the hex nut with a wrench to make sure

- 1 for handheld shower head / 1 for fixed shower head

- 1. Hex nut is fully tightened.
- 2. 3-way diverter is firmly connected to the shower arm.

4 Ensure a washer is in the ball joint of the fixed showerhead.

Attach the fixed showerhead to the 3-way diverter by turning clockwise.

(5) Ensure the fixed showerhead is tightened to the diverter.

Put the screw into the hole located on the ball joint, then fasten it tightly with the Allen key.

(6) Ensure a washer is in each of the hose nut.

Connect -

HEX NUT to the DIVERTER and CONICAL NUT to the HANDHELD SHOWER HEAD.
