

Guide to Choose the Right Stools Height

28" Counter Height

- 1 Measure the height of your counter or bar.
- 2 Leave a gap of about 10 to 12 inches between the top surface and the seat of the stool.
- 3 Subtract the gap from the counter or bar height to determine the stool height.
- 4 Consider the type of stool.

For counters that are 35" to 39" in height, choose a counter stool with a seat height of 26" from the floor to the seat.
