

Installation Steps:

- A: Pass the short straight pole (11), medium straight pole (10), long straight pole (9), and ceiling plate (4) through the main line (8) and tighten them all separately;
- B: Use the screws (6) to fasten the mounting plate (1) to the junction box;
- C: Connect the positive black wire of the main line (8) to the positive wire of the power supply (+) through the terminal block (5), and similarly connect the negative white wire to the negative wire of the power supply (—) through the terminal block (5), making sure that the bare wires are not exposed to prevent electric shock. Use the green screws (2) to fasten the light fixture ground wire (3) and the external ground wire to the mounting plate (1);
- D: Use screws (7) to fasten the ceiling plate (4) to the mounting plate (1) and fix the installed lamp;
- E: Tighten the bulbs (15) (not included) onto the lamp holder (14), then twist the glass shade (16) clockwise onto the decorative cover (13).
