## FLICK N' KICK FOOTBALL GAME RULES

**Object of the Game :** Score points by kicking field goals through the opponent's goal posts. First player to score 21 points wins the game. Players can use any one finger to flick the ball into the air.

**Game Rules:** Each player will attempt to kick the ball through the field goal post kicking 4 turns per round. After 4 kicks whether they are successful kicks or not, it becomes player 2's turn. All kicks will be made from the players own side of the field. Players will be awarded different amounts of points for each successful kick through the goal posts depending on how far the successful kick was made from. Kicks that do not go through the goal posts count as zero.

### Scoring Rules

Kick from own 40 yard line: 1 Point

Kick from own 30 yard line : 2 Points

Kick from own 20 yard line : 3 Points

Kick from own 10 yard line : 4 Points

Kick from own ENDZONE : 5 points

## **AIR POWERED HOCKEY:**

- 1.This game is designed to be played with two (2) players, one at each end, or with four (4) players, two at each end of the game table.
- 2.Play begins when the puck is placed on the playing surface. Players must hit the puck with the hand-held pushers and attempt to shoot into the opponent's goal.
- 3.One point is given when a puck is shot into the opponent's goal.
- 4.Winning: the winning goal is accomplished by being the first player to reach a predetermined score or by being the player to score the most points within a given period.

## **BILLIARDS:**

In the course of play, a player must call each shot in advance, by indicating the ball to be made and the pocket into which it will be made. It is not necessary to indicate details such as cushions, banks, caroms, etc. Failure to make the shot as called results in a loss of turn. If the shot is made as called, then any other balls pocketed remain pocketed. However, if the called shot is not made and any other balls are pocketed, then the shooter's ball(s) that were pocketed would be spotted and any of the opponent's balls would remain pocketed.

In order to execute a Legal Shot, the first ball hit must be one of the balls in the shooter's group (stripes or solids) and the object ball must be pocketed or the cue ball or any object ball must come into contact with a rail. (Note: It is legal for the shooter to bank the cue ball off a rail before hitting the object ball.) A player who legally pockets a

# Game Rules

ball continues play until missing or committing a Foul. Once a player's ball group (stripes or solids) is pocketed, the player may play the 8 ball. Again, the player must clearly indicate the intended pocket, even if it appears obvious. A player who legally pockets all of his ball group and the 8 ball is the winner.

## FOULS

1. Failure to execute a legal shot as defined above.
2. A scratch shot (shooting the cue ball into a pocket or off the table)
3. Moving or touching any ball by means other than legal play.
4. Shooting an intentional jump shot over another ball by scooping the cue stick under the cue ball. (A jump shot executed by striking the cue ball above center is legal.)
5. Using the 8 ball first in a combination shot when the table is not open.

## TABLE TENNIS:

In singles, the server first makes a good service and then the receiver makes a good return. Thereafter, server and receiver alternately each make a good return. In doubles, the server first makes a good service and the receiver returns the ball. Then the partner of the server makes a good return, followed by the partner of the receiver returning the ball. Thereafter, each player alternately in that sequence makes a good return.

### Serving

After hitting it, the ball must first touch the server's own court and pass directly over the net or around the net assembly, then touching the receiver's court. In doubles, the ball must first touch the server's right half-court or center line, pass over the net, and then touch the receiver's right half-court or center line. If, in attempting to serve, a player fails to strike the ball while it is in play, he loses a point. Return After the ball is served or returned in play, it is struck so that it passes directly over the net and its assembly and touches the opponent's court. A returned ball which touches the net or its supports on the way over to the other side, is considered a good return. The ball is in play from the last moment at which it is stationary on the palm of the server's free hand before being projected in service until:

- a point is scored.
- it touches the same court twice consecutively.
- it has been volleyed.
- it touches a player, or anything he wears or carries, other than his racket or his racket hand below his wrist.
- it touches any object other than the net or its support (referred to above).
- it is struck by a player more than once consecutively.
- it touches, in a doubles service, the left half-court of the server or receiver.
- it is struck, in doubles, by a player out of sequence, except where there has been a genuine error in playing order.

Congratulations! You have now assembled your Swivel Table. Please note the Care and Use instructions below to ensure many years of trouble free use of your Swivel Table.

## CARE AND USE OF YOUR HOCKEY TABLE

1. Use only a suitable 120v AC household outlet, and insure the cord is not a trip hazard.
2. For long life and best play from your air hockey table, apply spray furniture polish to clean cloth and wipe down the playfield with air motor running to make the pucks slide faster before first play and frequently thereafter.
3. Use spray furniture polish to clean all exterior surfaces of your billiards table.
4. Use the Billiards Playfield brush provided to clean the cloth on the billiards table.
5. Use a carpenters level to properly level table using the leg levelers.
6. This product is intended for **INDOOR** use only.
7. **DO NOT** operate the motor if the cord is damaged in any way.
8. **DO NOT** sit, climb or lean on the table.
9. **DO NOT** drag the table when moving it. This will damage the legs.
10. **DO NOT** set drinks on the table.
11. It is suggested that this table be placed close to wall thus allowing the air motor cord to **NOT** be a trip hazard. Always turn air motor off when table is not in use.
