Thank you for purchasing from CHITA LIVING. Please read this manual carefully before using and keep this manual for future reference. The design and/or specification of this product is subject to change without notice.

# Welcome to CHITA LIVING

If you are reading these instructions, the hard part is already out of the way. Surrounded by all these boxes, you may feel a little overwhelmed. No worries, we will walk you through and you will find the assembly process easy, intuitive and mostly, fun. Here are some tips before you get started.

1. Count the boxes. Check if you have received all boxes using the diagram on next page. Do not start the assembly process until all boxes are present. If you have not received all boxes or received wrong boxes, please contact our customer service at [support@chitaliving.com](mailto:support@chitaliving.com) and we will get back to you. Do not discard any of the packaging until you are certain that you have all the necessary parts for the assembly.
2. Do not open all boxes at once. Start with Arms Box and Left Seat & Backrest Box to assemble the Left Armchair. Then, move on to open the Right Seat & Backrest Box to assemble the Right Armchair. Next, assemble the Armless Chair, and finally, the Ottoman.
3. After the assembly is complete, feel free to enjoy your modular sofa as much as you can. However, please ensure that the packaging is disposed of in a safe and environmentally responsible way.
4. For your safety (as well as sofa's), do not sit on the backrest during and after assembly and never use this sofa as a step ladder.

**!** Do not start the assembly process until all boxes are present.

## Bonus Feature

Now you have successfully completed the assembly of each module. Based on the number of modules you purchased, you may remix your modular sofa in multiple configurations. In the diagrams on following pages, there are several configurations for your reference. After you decide which configuration you love the most, you may connect the chairs with Metal Connectors. In addition to non-slip legs, these Metal Connectors are provided to further help prevent the chairs from sliding apart.

**Step 1:** Put the chairs side by side, with the base of the chair facing you.  
**Step 2:** Attach the Metal Connectors by screwing on the legs firmly. You may have a few extra Metal Connectors left over. They are included in case you want to connect additional modules in the future. We recommend storing them in the little zip-top bag in case you decide to expand your sofa later.

**Note:** Ottoman is a standalone piece and cannot be attached to any chair with Metal Connectors.
