

INSTALLATION GUIDE

STEP1

Locate the desktop panel and flip it over. There are metal nuts around the edges of the metal frame; remove these nuts (as shown in Image 1).

Then place the metal table legs into their corresponding positions and tighten the nuts to secure the legs.

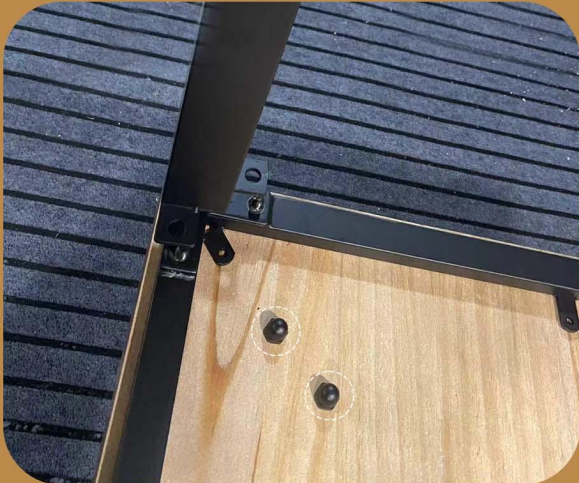

Image 1

STEP2

Lift the tabletop with the legs installed onto the cabinet, align it with the holes, and then tighten the screws to secure the cabinet (see Image 2 and 3)

INSTALLATION GUIDE

STEP3

Install the metal frame shown in Image 4 onto the desktop of the desk (there is no fixed position; it depends on the customer)

Image 4

STEP4

Place the wooden board shown in Image 5 into the assembled metal frame. Then the bookshelf is fully assembled.

NOTE

Reserve holes are provided on the metal frame (as shown in Image 6).

Customers can decide whether to fix it on the wall or on the desk according to their own needs.
