Green Trace 2

D2206S44106-3571

Green Trace II is a fine art print of a Cyanophyllum Magnificum leaf that evokes the charm of a vintage accademia gallery wall of botanical illustrations. The plant is native to tropical regions of Central and South America and is often referred to as the “velvet leaf” due to its luxuriously smooth feel. The leaf’s vibrant emerald-green surface is complemented by subtle hints of olive green. Texture is a standout with the leaf’s distinctive pattern of prominent central veins along with delicate interwoven veins that present a crackling effect. The print’s alluring visual qualities and striking texture make it a sought-after addition to any art botanical collection.

An exquisite display of color and depth in a famous botanical form, Green Trace 2 is part of the carefully curated ART by TA Collection.
