

Baja II

From a million forgotten attics and sleepy antique stores, we rescued the beauty and charm of another era — early 20th-century industrial America.

We brought those vibrant times to life once again through our fabulous “Baja II” group. This stunning collection resurrects the simplistic lines and understated elegance that were the trademark of an earlier booming America, when anything seemed possible.

Each piece features the finest ash veneers and alluring metals and a solid, sturdy construction that would make any craftsman proud. Heavy industrial casters on select tables add a touch of panache to the original design. The heavily distressed Vintage Umber finish with rustic distressed metal accents creates an authentic, unforgettable look.

With the “Baja II” collection, your home will feel like a brighter and bolder place. It will feel like the America of a hundred years ago — optimistic, welcoming and full of endless possibilities.
