Installation Steps

STEP 1

First, remove the protective film from the bottom ring and wipe clean both side of the ring.

STEP 2

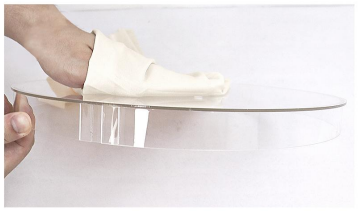

Second, peel off the protective film from both sides of the barrel body, including the inner and outer one.

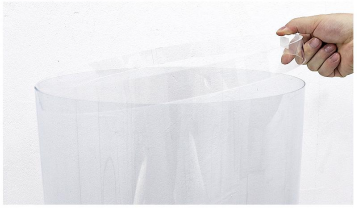

STEP 3

Third, remove the protective film from the round cover and wipe clean the inner side and surface of the cover.

STEP 4

Fourth, slowly insert the bottom ring until it fully expands the barrel body into a round shape.

STEP 5

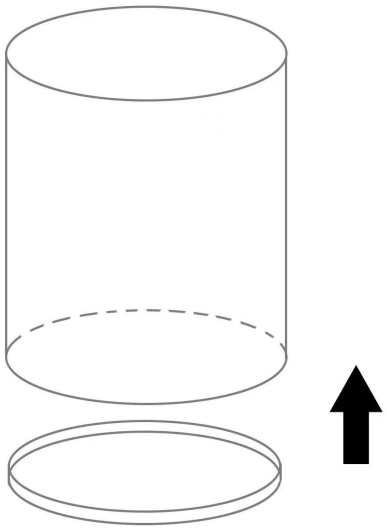

Fifth, slowly insert the round cover along the inner edges and slightly press it until completely inserted.
