

Terrazzo Product Manual

- 1. PRODUCT MATERIAL :** The main materials of the terrazzo product are cement and natural stone particles.
- 2. PRODUCT PERFORMANCE :** The surface is treated with a stain-resistant coating, preventing water absorption and discoloration.
- 3. PRODUCT MAINTENANCE :** For daily maintenance, simply wash with water and wipe with a cloth. In cases of stubborn stains that are difficult to remove, can use alcohol for cleaning. This cleaning way will not damage the stain-resistant coating, ensuring consistent stain resistance.

Note : The stain-resistant coating is applied after the terrazzo product is finished, so its hardness is lower than that of the terrazzo itself. During the cleaning process, avoid using hard cleaning tools like steel wool to prevent scratching or damaging the coating, which could lead to water absorption in the product.

4. USAGE SCENARIOS AND INSTALLATION

- ① **Vessel Sink:** Install the hardware accessories and set the basin on the countertop and apply glass glue around the bottom edge to seal it.
- ② **Integrated Sink:** Install the hardware accessories and place the basin on the cabinet/bracket. Use glass glue to seal the joint between the basin and the wall.
- ③ **Pedestal Sink:** Install the hardware accessories and set the pedestal sink in the designated location and use glass glue to seal the sink-to-floor joint.
