

CARE INSTRUCTIONS

*Before placing covers on patio furniture, make sure all furniture clean and dry; residue trapped on the surface can create mold.

*Spot wash or hand wash using a cleaning mixture of cold or lukewarm water and mild soap.

*Avoid using abrasive cleaning tools. Use only a clean cloth, sponge or a soft bristle brush.

*Avoid harsh detergents. Prolonged exposure to harsh chemicals can damage the interior lining.

* Hang to air dry. Do not use dryer or iron as exposure to high heat can damage the fabric beyond repair.

INSTALLATION INSTRUCTION

1. Before placing covers on furniture, make sure all furniture clean and dry. Check your furniture to make sure there are no sharp objects or corners that could stress your cover as you pull it on.

2. Place cover over furniture properly; tie down all corners of the furniture with the straps and buckles. Pull the rope on the hem tight.

* Fire pit covers don't have straps and buckles. Just use the rope on the hem to pull the cover tight.

* Cushions should be stored in a dry place when not in use for an extended period of time and during the off season. Cushions must be completely dry before storage.
