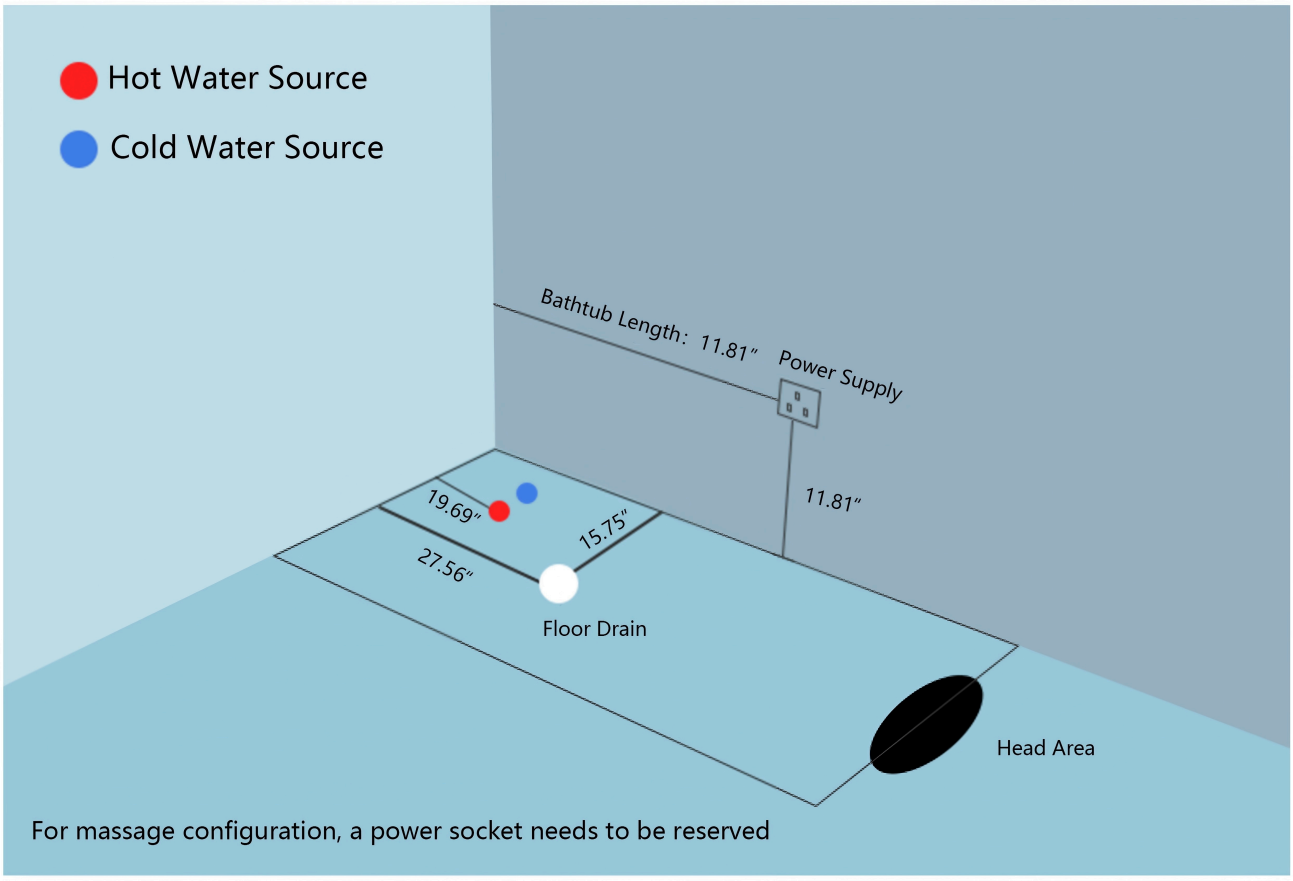
Installation Preparation

Refer to the following installation diagram



Warm Reminder:

These are the plumbing and electrical diagrams for reference after tiling; a slight deviation in the position of plumbing and electrical fixtures is acceptable.

1.A power supply needs to be installed for massage/bubble configuration

2.The floor drain diameter needs to be larger than 1.3 ", The distance between the hot and cold water sources is approximately 3.94"~5.91".

3.During installation, please prepare angle valves and mildew-resistant glass glue by yourself, and install a waterproof cover for the power supply.
