

# INSTALLATION INSTRUCTIONS

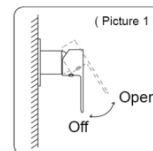

## Faucet types

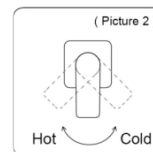

No.	Description
1	Spout
2	Adapter
3	Protection cover
4	Screws bag
5	Shower valve body
6	Decorative cover
7	Handle
8	Allen keys
9	Allen screw
10	Trim cap
11	Fixed joints

## Instructions for use

1. Turn on the faucet as picture 1 shows. The greater the handle angle, the greater the water flow; Conversely, the smaller the handle angle, the smaller the water flow, until it is closed.

2. Turn on the faucet. Adjust handle to left to get more hot water; Adjust handle to right to get more cold water. Shown as picture 2.

## Cautions:

- Before installation, all water lines must be flushed at least 60 seconds to remove any foreign material so that the foreign material will not block the aerator or damage the cartridge.
- After installation, please check if all connections were well installed, and make sure there are no leakage.
- Use water and soft cloth to clean the faucet.
- Use a mild liquid detergent for cleaning, do not use abrasive detergent that may scratch or dull the surface.

### ⚠ Warning:

You can seal the wall only when there are no any leakage after install the shower valve body and water pipe.
