

Efficiency you can measure. Certified by Energy Star and AHRI

The Vanguard Series delivers up to 24 SEER2 across four SKUs. All four models heat down to -13°F and carry Energy Star and AHRI certification, so your customers get independently verified efficiency, not a marketing claim. A single wall-mounted unit replaces a standalone heater and air conditioner, runs as quietly as 30 dB(A).

PERFORMS WHERE OTHERS STOP

Heats down to -13°F. Still delivers 7,500 BTU at 5°F – at temperatures where most competing units shut down entirely. One compact unit cools and heats your customers' spaces through every season.

UP TO 24 SEER2 – ENERGY STAR & AHRI CERTIFIED

While most mini splits in this category rate 19–21.5 SEER2, the Vanguard reaches up to 24 – drawing measurably less power for the same output. R32 refrigerant. Third-party certified. The numbers back the claim.

SHIPS COMPLETE. INSTALLS CLEAN.

25 ft pre-charged line set, wall bracket, outdoor pad, washable filter, and all hardware in the box. No parts to source. 5-year compressor warranty + 1-year parts. Professional installation recommended.
