Put the card in this position and you can open the small drawer.

Precautions for card lock

When unlocking the drawer, you need to pay attention to it. Please open the drawer within 4 seconds after hearing a drip, otherwise the lock will lock the drawer.

If you find that you can open the drawer without swiping your card, please check whether the battery in the lock is dead or loose.

When you find that the lock is not working, you need to check the state of the battery.

User's Guide

A29

Thank you for purchasing this product.

To use this product, please connect it to a power source.

Please use if the product works normally after connecting to power.

Introduction

The box is an intelligent controller. It has 1 USB output port 1 Type-c port .

With 2 touch buttons, it can turn. ON/OFF the light, change light colors, and adjust the light luminance.it can and turn ON/OFF the induction function.

Operation

This touch button is used to turn on/off, change colors, and adjust brightness.

- A. Short touch -> lighting on -> short touch -> change light color -> short touch -> change light color -> short touch -> lighting off.
- B. Long touch -> adjust the luminance. (The brightness of each color can be adjusted individually)

This touch button is used to turn on/off the induction function.

- A. Short touch to turn on the induction function. It can auto-turn on the light when people are close to the controller in 1 meters. It can auto power off the light when the body is far away from the controller after 30 seconds.
- B. Long touch to turn off the induction function.
- C. Note: When you touch the light button to change the light modes, the induction function will automatically turn off. It is best to turn on this function after selecting the light color and adjusting the brightness you want.

ATTENTION PLEASE

- 1. If there is no touch response suddenly, Re-plug the power to reset the touch static electricity.
- 2. If you have any questions when installing, please feel free to contact us. Thank you.
