8x13 FT Green Screen Background Support

Pipe with Elbow x 16

Straight Pipe x 16

Green Screen x 1

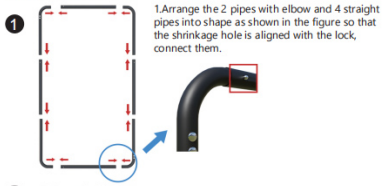

Buckle x 12

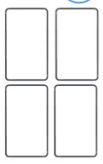

Storage Bag x 1

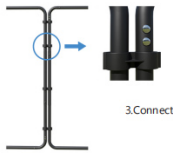

Installation Notes:

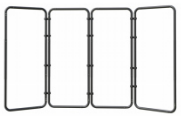

1.Arrange the 2 pipes with elbow and 4 straight pipes into shape as shown in the figure so that the shrinkage hole is aligned with the lock, connect them.

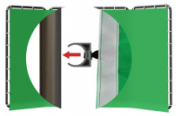

2.Repeat the above steps to assemble the remaining pipes into 4 door-shaped frames.

3.Connect them two by two with buckles.

4.Connect remaining parts and get the shape as shown in the figure.

5. Take out the green screen and attach to the frame.

6. After the green screen is installed, lift it up and adjust it to a suitable shape.

Warning:

1. It is recommended to lift up the entire background after the ground installation is completed.
2. Please fold it when moving the background to avoid toppling over.
3. Do not pull the buckle violently to avoid scratching the tube body.
4. If the green screen is dirty, it can be cleaned with neutral detergent. Do not mix with dark colored fabrics which may cause staining.
