

POOL SAFETY COVERS

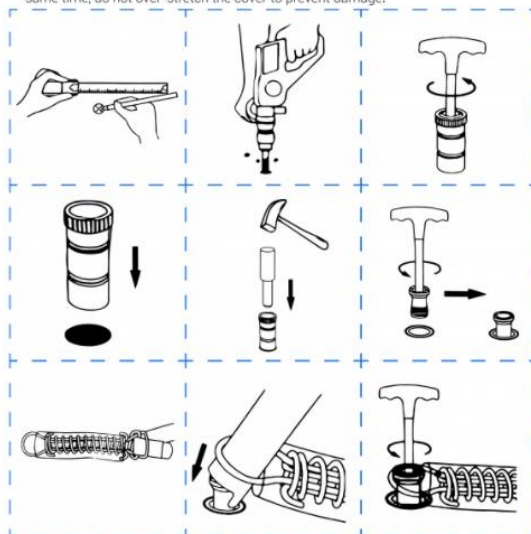

Product Manual

Directions for use

INSTALLATION INSTRUCTIONS

- Preparation:** Before installation, ensure there are no sharp objects around the swimming pool. Clean the pool edges and surface to prevent sharp objects from damaging the cover. Meanwhile, prepare the accessories required for installation.
- Laying the Cover:** Spread the swimming pool cover flat on the pool surface, ensuring it completely covers the pool. Try to keep the cover smooth and avoid wrinkles or accumulation. Adjust the position of the cover according to the shape of the pool to ensure the edges are aligned.
- Securing the Cover:** Use the provided fixing ropes or clips to secure the edges of the cover to the fixing points around the pool. When securing, ensure uniform force is applied to avoid loose fixing in some areas that may cause the cover to shift. At the same time, do not over-stretch the cover to prevent damage.

Usage Precautions

Weight Limit: Strictly adhere to the load-bearing capacity specified by the product. Avoid vigorous activities or concentrated stacking of heavy objects on the cover to prevent damage caused by exceeding its weight limit. Children must be supervised by adults when in contact with the cover to prevent accidents.

Weather Preparedness: Before severe weather such as strong winds, heavy rain, or snowstorms, check the fixing status of the cover and reinforce loose fixing points. If the wind is too strong, it is recommended to temporarily remove the cover for proper storage and reinstall it after the weather improves, to avoid the cover being torn or blown away by strong winds.

Daily Inspection: Regularly check the surface of the cover for damage, scratches, and the firmness of fixing points. If small holes or minor damage are found, promptly repair them with the supporting repair materials.

Frequently Asked Questions and Solutions

DAILY INSPECTION	POSSIBLE CAUSES	SOLUTIONS
The cover cloth is loose	Loose fixing points or aging fixing ropes	Inspect and re-reinforce the fixing points, and replace aging fixing ropes
Stains exist on the surface of the cover cloth, which cannot be removed by regular cleaning	Stubborn stains	Use a specialized fabric cleaner and clean according to the instructions
Local damage to the cover cloth	Accidental scraping or excessive load-bearing	Repair the damaged area with patching materials; if the damage is severe, contact after-sales service for replacement

After-Sales Service:

This product comes with a 3-year quality guarantee. During the warranty period, if the product is damaged due to quality issues, we will provide free repair or replacement services.

If you encounter any problems or need technical support during use, please feel free to call our customer service hotline. Our professional after-sales team will respond to your inquiry and provide solutions within 7 working days.
