

Installation Steps:

Thank you for using our products. Please read the operating instructions before installation. Please keep this instruction as a reference. Disconnect the power supply before installing this product. We recommend installation by a professional electrician.

1. Fix the wall plate in the reserved mounting box.
2. Connect the black wire to the black power cord with the wire cap (provided) and the white wire to the white power cord and wrap tightly with insulating tape. Connect the ground wire from the fixture to the ground wire in the junction box. If the house does not have a ground wire, connect it to the green screw on the wall plate. (Screw label: GND).
3. Secure the fixture to the wall plate with the round head nut.
4. Adjust the fixture at the desired angle, then fasten securely.
5. Install the light bulb to the light head position.

Attention:

1. The input power of the lamp is AC 120V 50Hz.
2. Any behavior that violates residential fire protection regulations is prohibited.
3. Under no circumstances should the lamps be covered with heat insulation pads or wooden materials.
4. Before maintenance, make sure that the power supply of the lamp has been cut off and the light source has cooled down. Before powering on, make sure that the light source and the lamp holder are connected correctly.
5. Please wipe with a towel or flannel, and clean the lamp body with a non-corrosive detergent. Do not scrub directly, wipe with water or a damp cloth.
6. If you have any questions about this manual, please consult a qualified lighting installation engineer.
