

ARCUS TRAY

AYI20

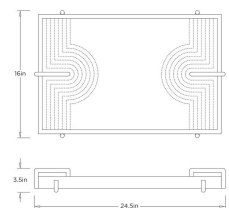

H: 3.5 IN

W: 24.5 IN

D: 16 IN

Inspired by the rhythmic repetition of classical arches, the Arcus Tray presents a refined take on architectural symmetry. The tray's surface features carefully stitched details that echo the cadence of architectural arches, creating a subtle pattern that brings structure and rhythm to its design. Wrapped in supple juniper leather, it offers a rich, saturated hue and a polished tactile experience. This piece introduces an understated, organic flow and a sophisticated layer of texture to any tabletop.
