

Brightech®

LightView Pro Rolling Base Assembly & Free Extended Warranty Instructions

Caution: The glass is removable and can break.

Please handle with care. If you unscrew the ring that seals the glass in place (e.g. to remove and clean the lens), screw the ring back on after you're done.

Assembly Instructions

1. Insert the pole (part 1) in the hole in the middle of the floor stand (part 2).
2. Place the wave washer (part 3) and spring washer (part 4) on the other side of the hole, then use the hex key (part 6) to screw the bolt (part 5) through the washers and into the pole. Screw until tight.
3. Place the stem of the magnifier's folding arms into the pole. Use the fixing screw (part 7) to secure the stem in place.

For Safe Use:

1. Indoor use only - keep out of direct sunlight to avoid fires!
2. Environmental temperature: 23 F to 104 F.
3. Environmental humidity: max 95%.
4. Ensure the ring is screwed closed, sealing the glass in place, before first use and after any time you remove it.

Free: Extend Your Warranty For Two More Years

Extend your warranty from 3 years to 5 by registering your purchase. Just fill in the brief product registration form at brightechshop.com/pages/extended-warranty/
