Thank you for choosing **Upper Bounce®** for your trampoline and trampoline replacement needs! When you select **Upper Bounce®**, you are choosing high quality trampolines, or replacement parts and accessories. At **Upper Bounce®** we think about "fun and safety" for the whole family!

Measuring Tips For Mat

The Upper Bounce® Jumping Mat you purchased is designed to fit your Trampoline model if the specifications of the Jumping Mat and your Trampoline are the same. The Model number of the Jumping Mat indicates the specifications your trampoline should have, such as: Frame and Spring size and Spring amount. (See list of Model Numbers on page 11). Before starting the installation process you will want to make sure that the mat is the right size to fit your frame perfectly and only then go ahead with the assembly.

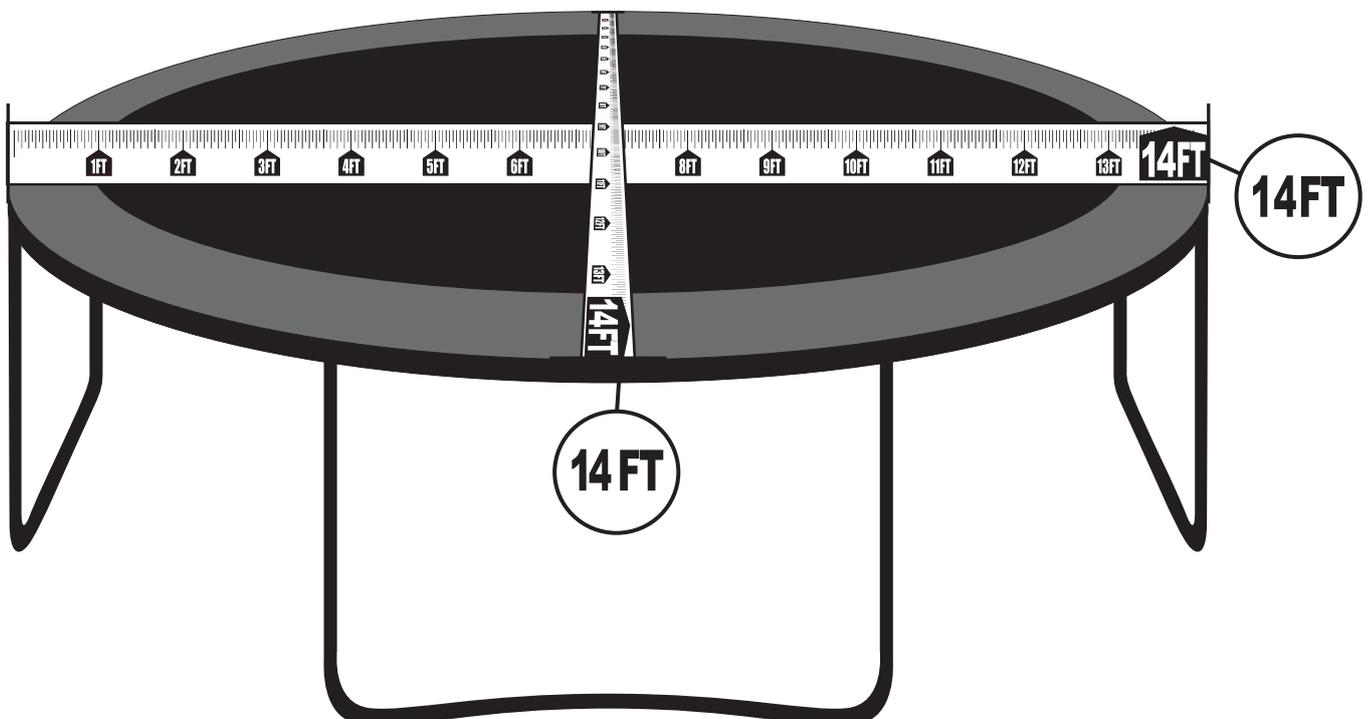

These are the steps to make sure you purchased the right Mat :

STEP

1

Measure the frame size

Measure your frame from one outside edge vertically and horizontally to the other outside edge so you get the correct measurements.

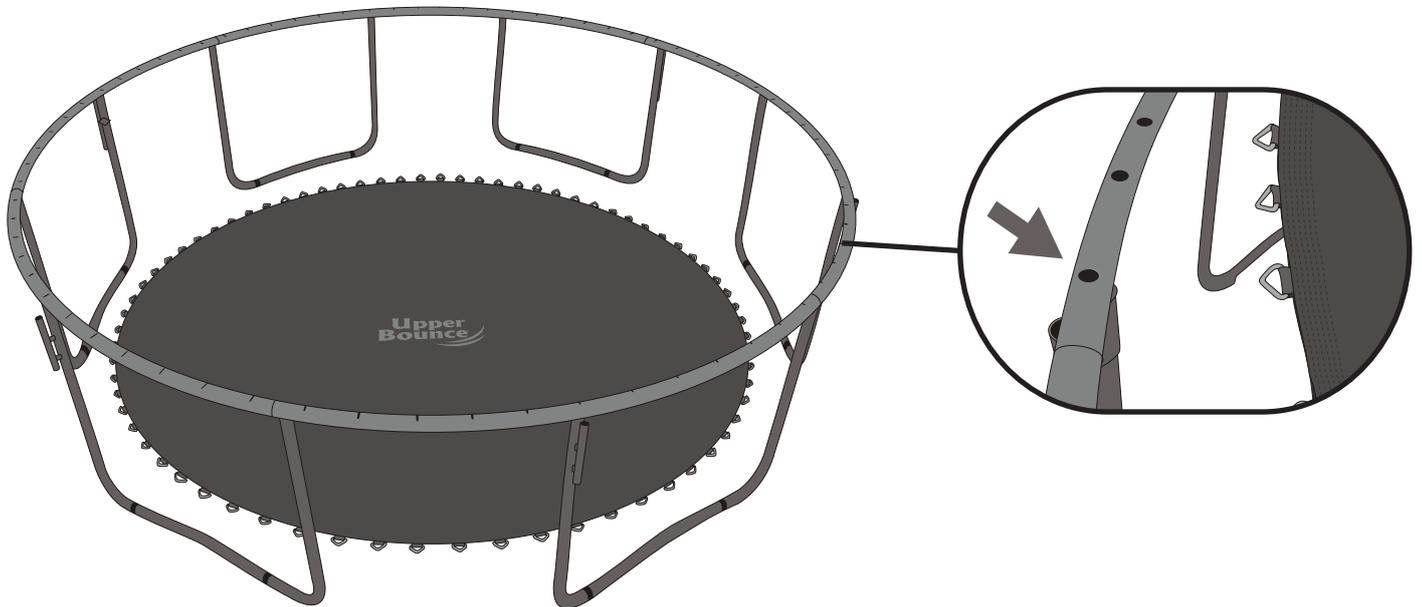

STEP

2

Know the amount of spring holes

Count the amount of spring holes on your trampoline frame.

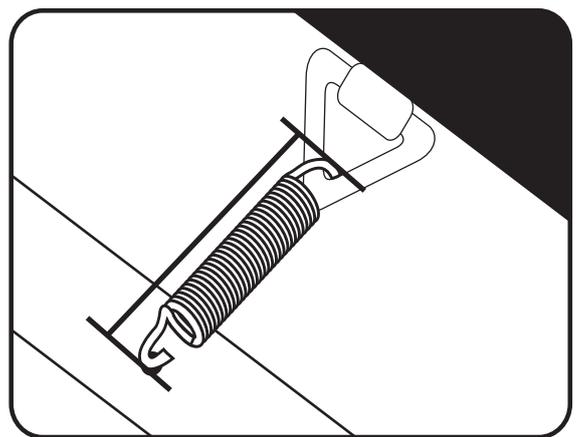

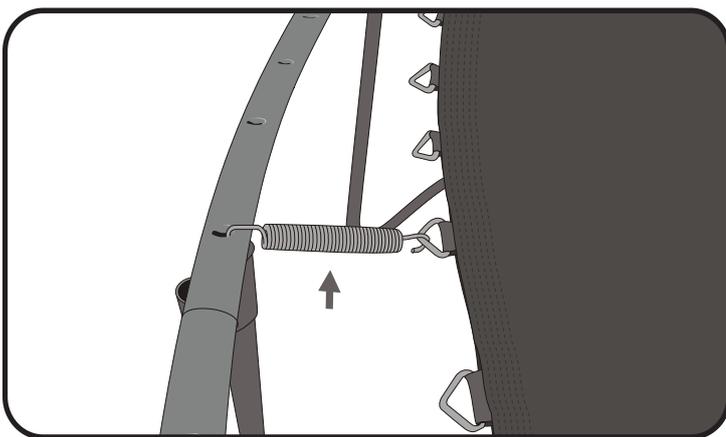

STEP

3

Know the size of the springs

Measure the spring size from hook to hook unstretched.

Based on the

1) Frame Size

2) Spring Amount

3) Spring Size

Determine if you bought the correct Jumping Mat

IMPORTANT NOTICE

WARNING!

1. Be careful where you place your hands during spring assembly as connector points can pinch!
2. We recommend at least 2 people participate in assembling the Jumping Mat.

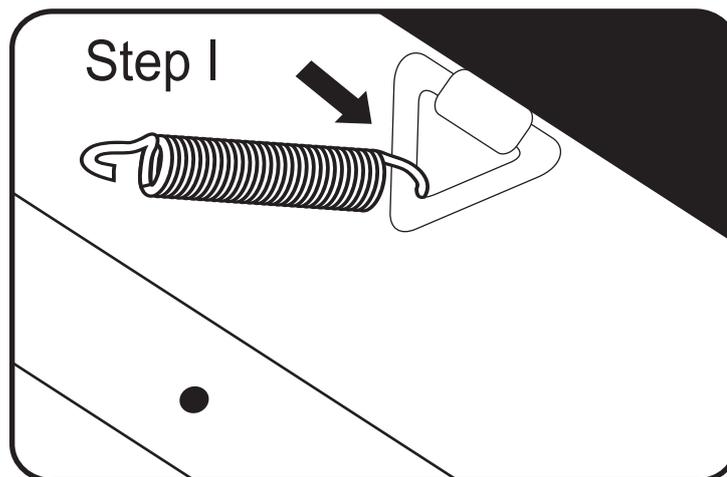

NOTE:

You will need to have a **Spring Tool** to help you install the springs for this mat to the frame (Not included in the purchase)

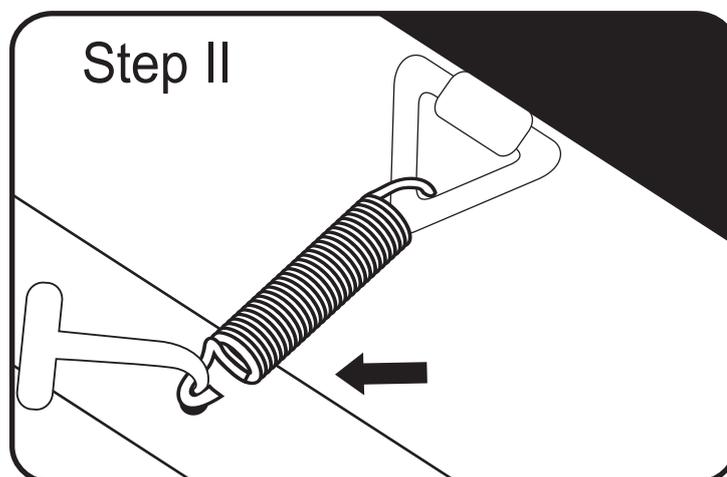

Our Spring Tool Model Name is: **UBHWD-TH**
To purchase this item, please visit our website www.upperbounce.com and search the above model #
or contact our Customer Service Department and ask for the above Model Number

How to use the spring pulling tool

Step I : Hook the more rounded end of the spring onto the trampoline mat's triangular rings.

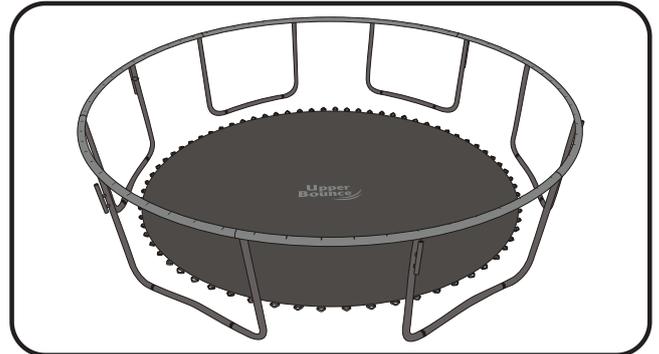

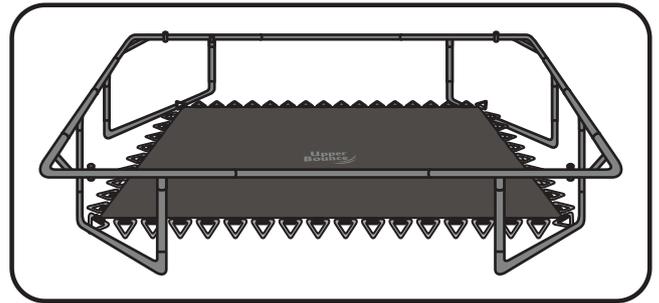

Step II: Extend the spring pull tool and link it up with the other end of the spring. Pull the tool in the direction of the trampoline frame until the spring head is lined up with the hole in the trampoline frame. Slide the spring end into the hole as you remove the tool.

TRAMPOLINE MAT ASSEMBLY

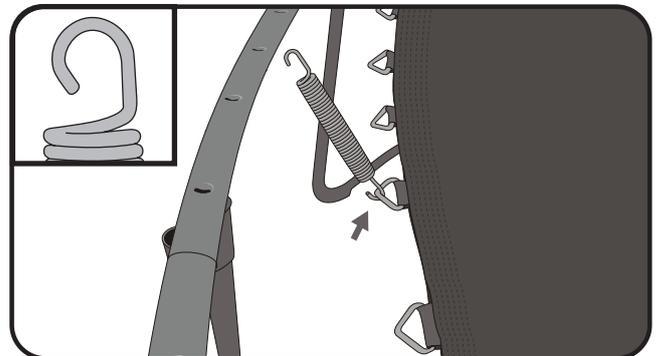

Step 1

With Stitching portion facing down lay jumping mat in center of the frame.

Step 2

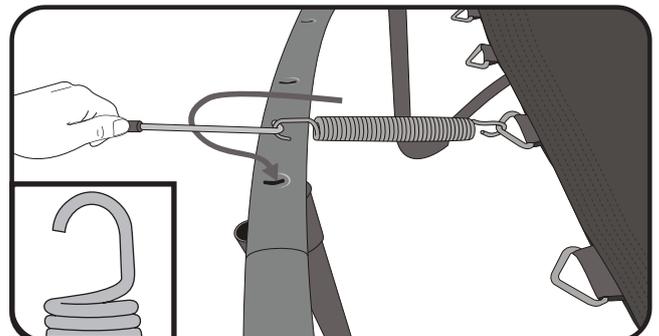

Take hold of the more tightly rounded spring end, attaching it to the triangular ring on the jumping mat.

Step 3

Then attach the other end of the spring to the hole in the trampoline frame, using the spring pull tool. (As shown on page 5.)

Follow the instructions on the next page for completing the springs installation process.

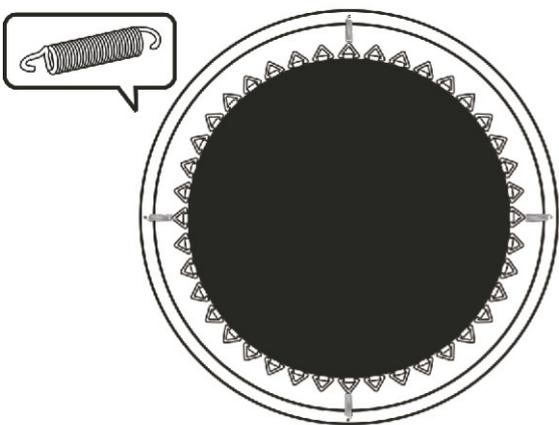

See below the Pattern of the springs assembly according to your frame style

SPRING ASSEMBLY PATTERN

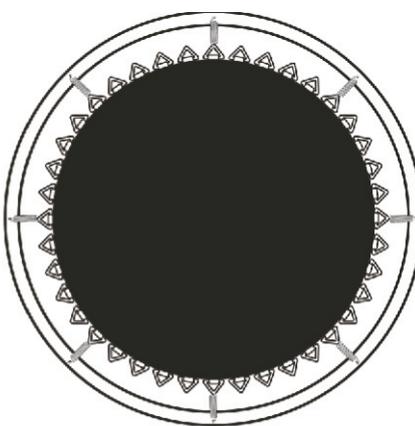

ROUND/OVAL

Note: Make sure that the difference of Vrings from 1 spring to the other matches the amount of frame holes.

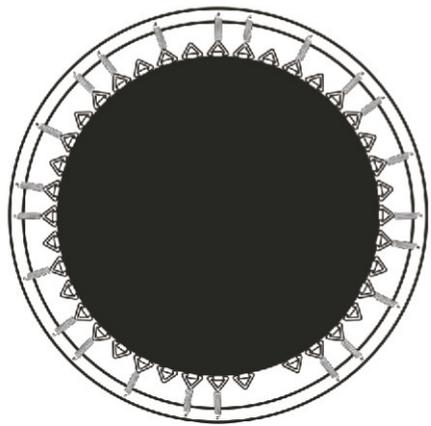

Step 1
First connect 4 springs 1/4 circle apart from each other.

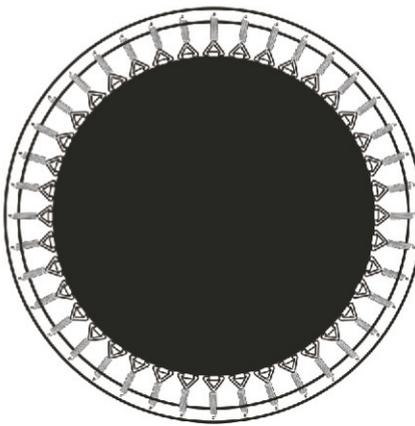

Step 2
Connect all middle springs as figure.

Step 3
Then continue, connecting every few springs.

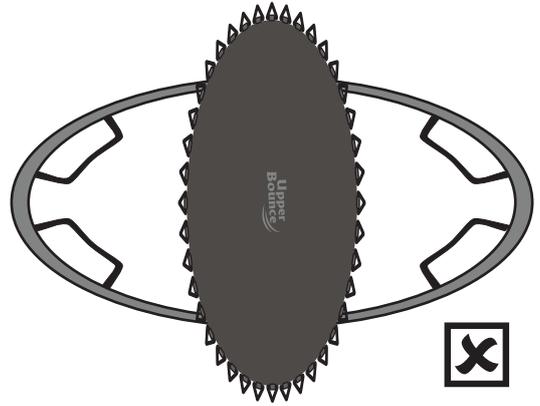

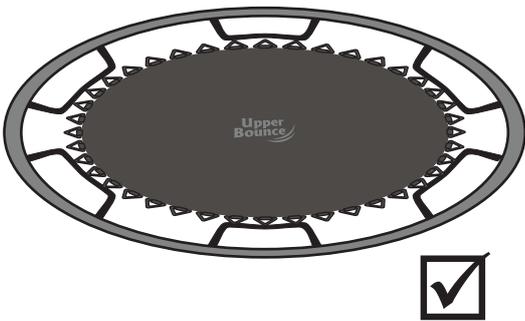

Step 4
Complete the rest of the springs.

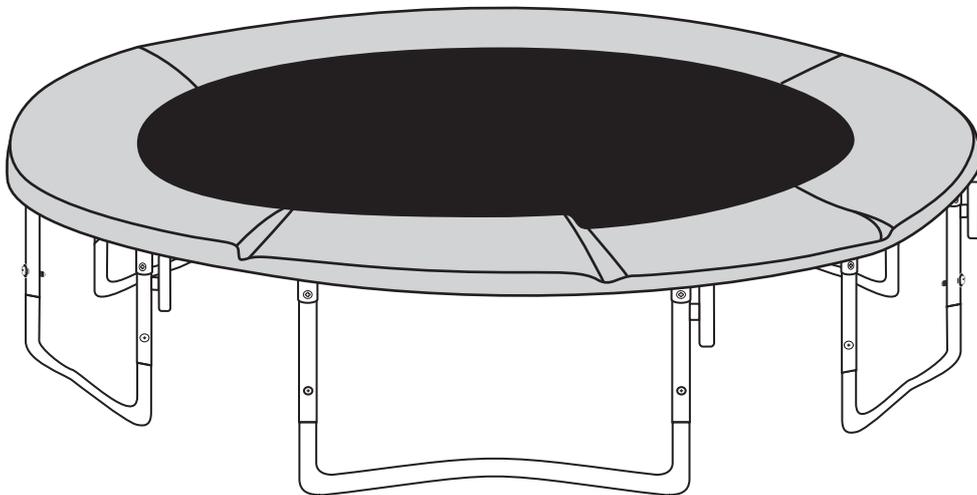

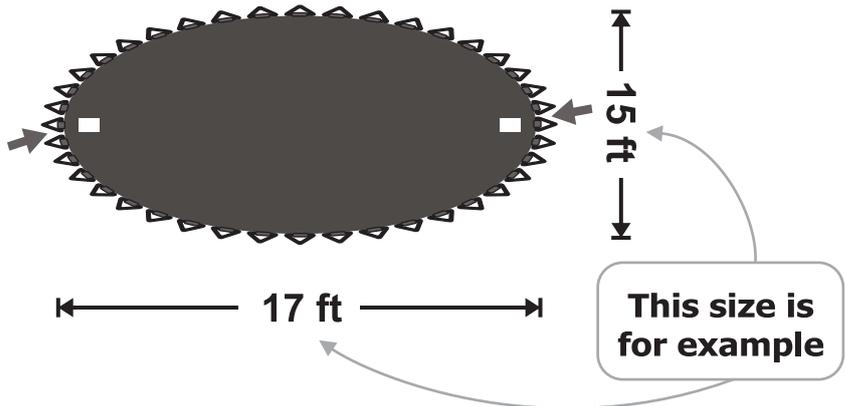

MAT LAYOUT

OVAL TYPE

Make sure to lay the oval/rectangular trampoline mat in the same direction as the oval/rectangular frame.

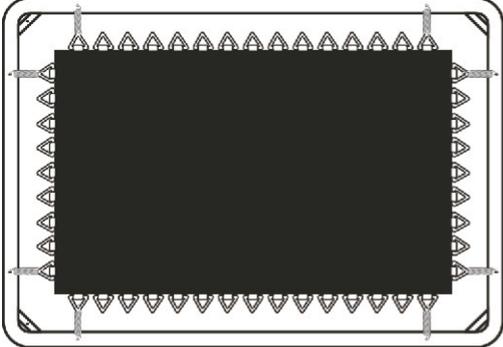

The Information Labels sewn onto the Mats Longer Angle are your indicators to organize mat on the longer side of the frame. See image.

SPRING ASSEMBLY PATTERN (RECTANGLE AND SQUARE TYPE)

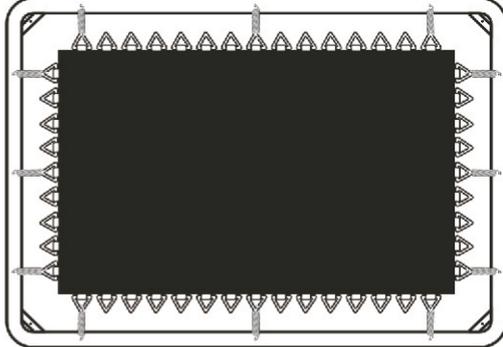

Note: Make sure the difference from 1 spring to the other should be the same as the holes of the frame.

Step 1
Lay the mat inside the trampoline.
Connect all corner springs.

The diagram shows a rectangular trampoline mat (black) placed inside a square frame. The mat is slightly offset from the center. The four corner springs of the frame are connected to the mat. The other springs are not yet connected.

Step 2
Connect all middle springs as figure.

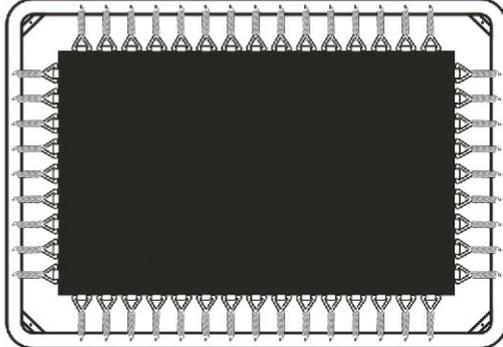

The diagram shows the mat in the frame. In addition to the corner springs, the middle springs along all four sides of the frame are now connected to the mat.

Step 3
Then continue connecting every few springs.

The diagram shows the mat in the frame. More middle springs are now connected to the mat, filling in the gaps between the previously connected ones.

Step 4
Complete the rest of the springs.

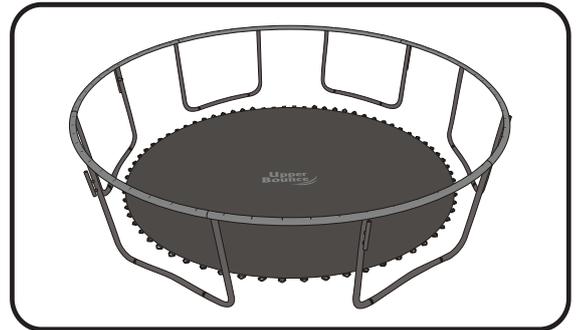

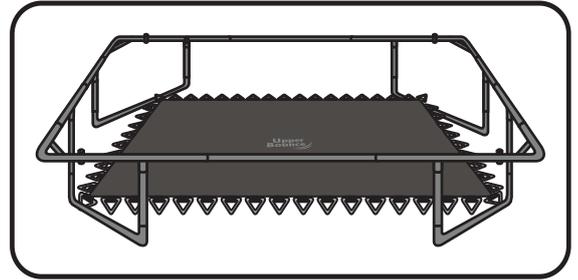

The diagram shows the mat in the frame. All middle springs along all four sides are now connected to the mat, completing the assembly.

TRAMPOLINE BAND MAT ASSEMBLY

BAND MAT

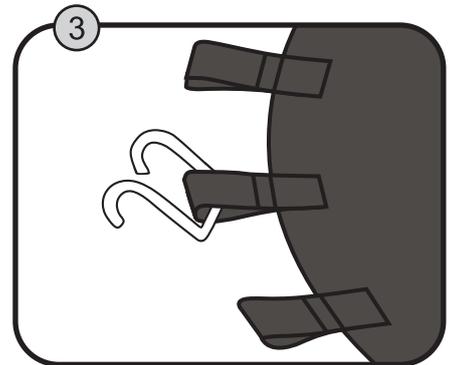

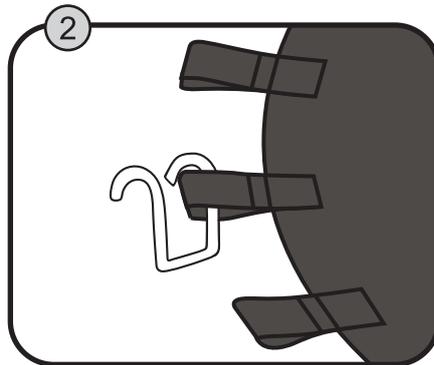

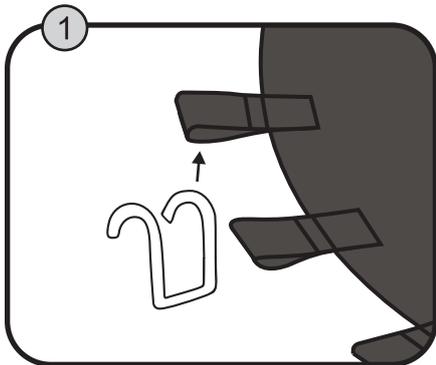

Step 1

With Stitching portion facing down lay jumping mat in center of the frame.

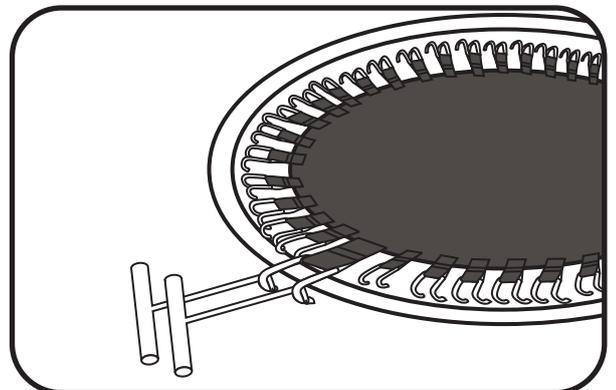

Step 2

Hook the galvanized hooks onto the trampoline mat edges, as shown in figure.

Step 3

Pull the Hooks with the T-hook until it reaches to the frame,

Upper Bounce® Jumping Mat Model List

The Model Numbers are indicators of the item details. The 1st set of numbers in the model number indicates the frame size. The 2nd set of numbers in the model number indicates the v-ring amount. The 3rd set of numbers in the model number indicates the spring size.
