

## Note:

1. Please allow 1-3mm difference due to manual measurement.
2. Item color displayed in photos may be showing slightly different on your computer monitor since monitors are not calibrated same.
3. This machine puts ice cubes of appropriate size into the elbow (the ice cubes should not be too broken, and the size of a single piece of ice should just fit into the elbow and hang out of the elbow not to exceed 20mm).
4. When in use, the outlet of the ice particles should not be blocked, otherwise it will cause the plate to get stuck and burn out the motor. If the above phenomenon occurs, please find out the cause immediately, cut off the power supply, and raise the handle.
