PARTS

A*1

Shade

B*1

Lamp Body

C*1

Socket ring

STEP 1

Place the lampshade (A) onto the top bolt part of the lampshade holder (B) as shown.

STEP 2

Twist the finial (C) to fix the lampshade.

ATTENTION

Please inspect the wires before installation, if the wires show any cut or abrasion, or has exposed copper wires,

DO NOT use the fixture, it might be caused during transportation or defect product.

Before starting installation of the fixture, please remove the previous fixture (if any). Disconnect the power by turning off the electric break for your property (Please ask for professional help if needed).

MAINTENANCE AND WARNING

- Verify the lamp model suits the environment (indoor/outdoor, IP rating) and check all accessories (body, screws, cord, manual).
- Only use with bulbs of the recommended type and wattage. Exceeding the maximum wattage may cause overheating or fire.
- Do not install the fixture if any part is damaged or missing.
- The fixture may become hot during use. Allow to cool before handling.
- Clean dust accumulation in recessed lamps regularly (to prevent overheating), but only when powered off; never rinse with water.
- If the fixture includes a dimmer switch, ensure it is compatible with the fixture before installation.
- Do not modify the fixture in any way; tampering with electrical components can result in malfunction or risk of fire.
