

Hello, this is the complete installation tutorial for the fish tank.

These are a water pump, light, filter cotton, filter material, and crystal column

Next,First, connect the white tube to Tighten the water pump sleeve. Put the water pump in again Fish tank water pump compartment, as shown by the arrow position in the picture

Next, place the filter medium in Rear filtration room, place the middle compartment

Place the red light tube above the fish tank as shown in the picture

There are 4 crystal pillars twisted at the arrow position, which can be adjusted for height

Finally, place the glass on the four crystal pillars and the fish tank installation is complete
