

FINEST QUALITY FUTON MATTRESSES

Twelve durable nylon tufts keep your mattress components in place for years of stability.

An upholstery grade fabric is tufted to the mattress to make your mattress aesthetically pleasing. No additional cover is needed.

A plush layer of breathable cotton nicely encases the futon components for superior comfort. The cotton acts as a fire barrier, meets all federal standards and has no harmful chemicals.

Layers of flexible foam add comfort and support to your sitting and sleeping experience.

This mattress utilizes thirteen gauge bonnell springs. The springs flex with your body movement to support you while you sit or sleep.

A synthetic insulation layer is placed over the spring to keep all materials from migrating into the spring.

Conversion from sitting to sleeping position is made easy with this unique hinge system. The hinge not only provides proper sitting and sleeping positioning, but also keeps the mattress in place while sitting.
