

Installation Manual

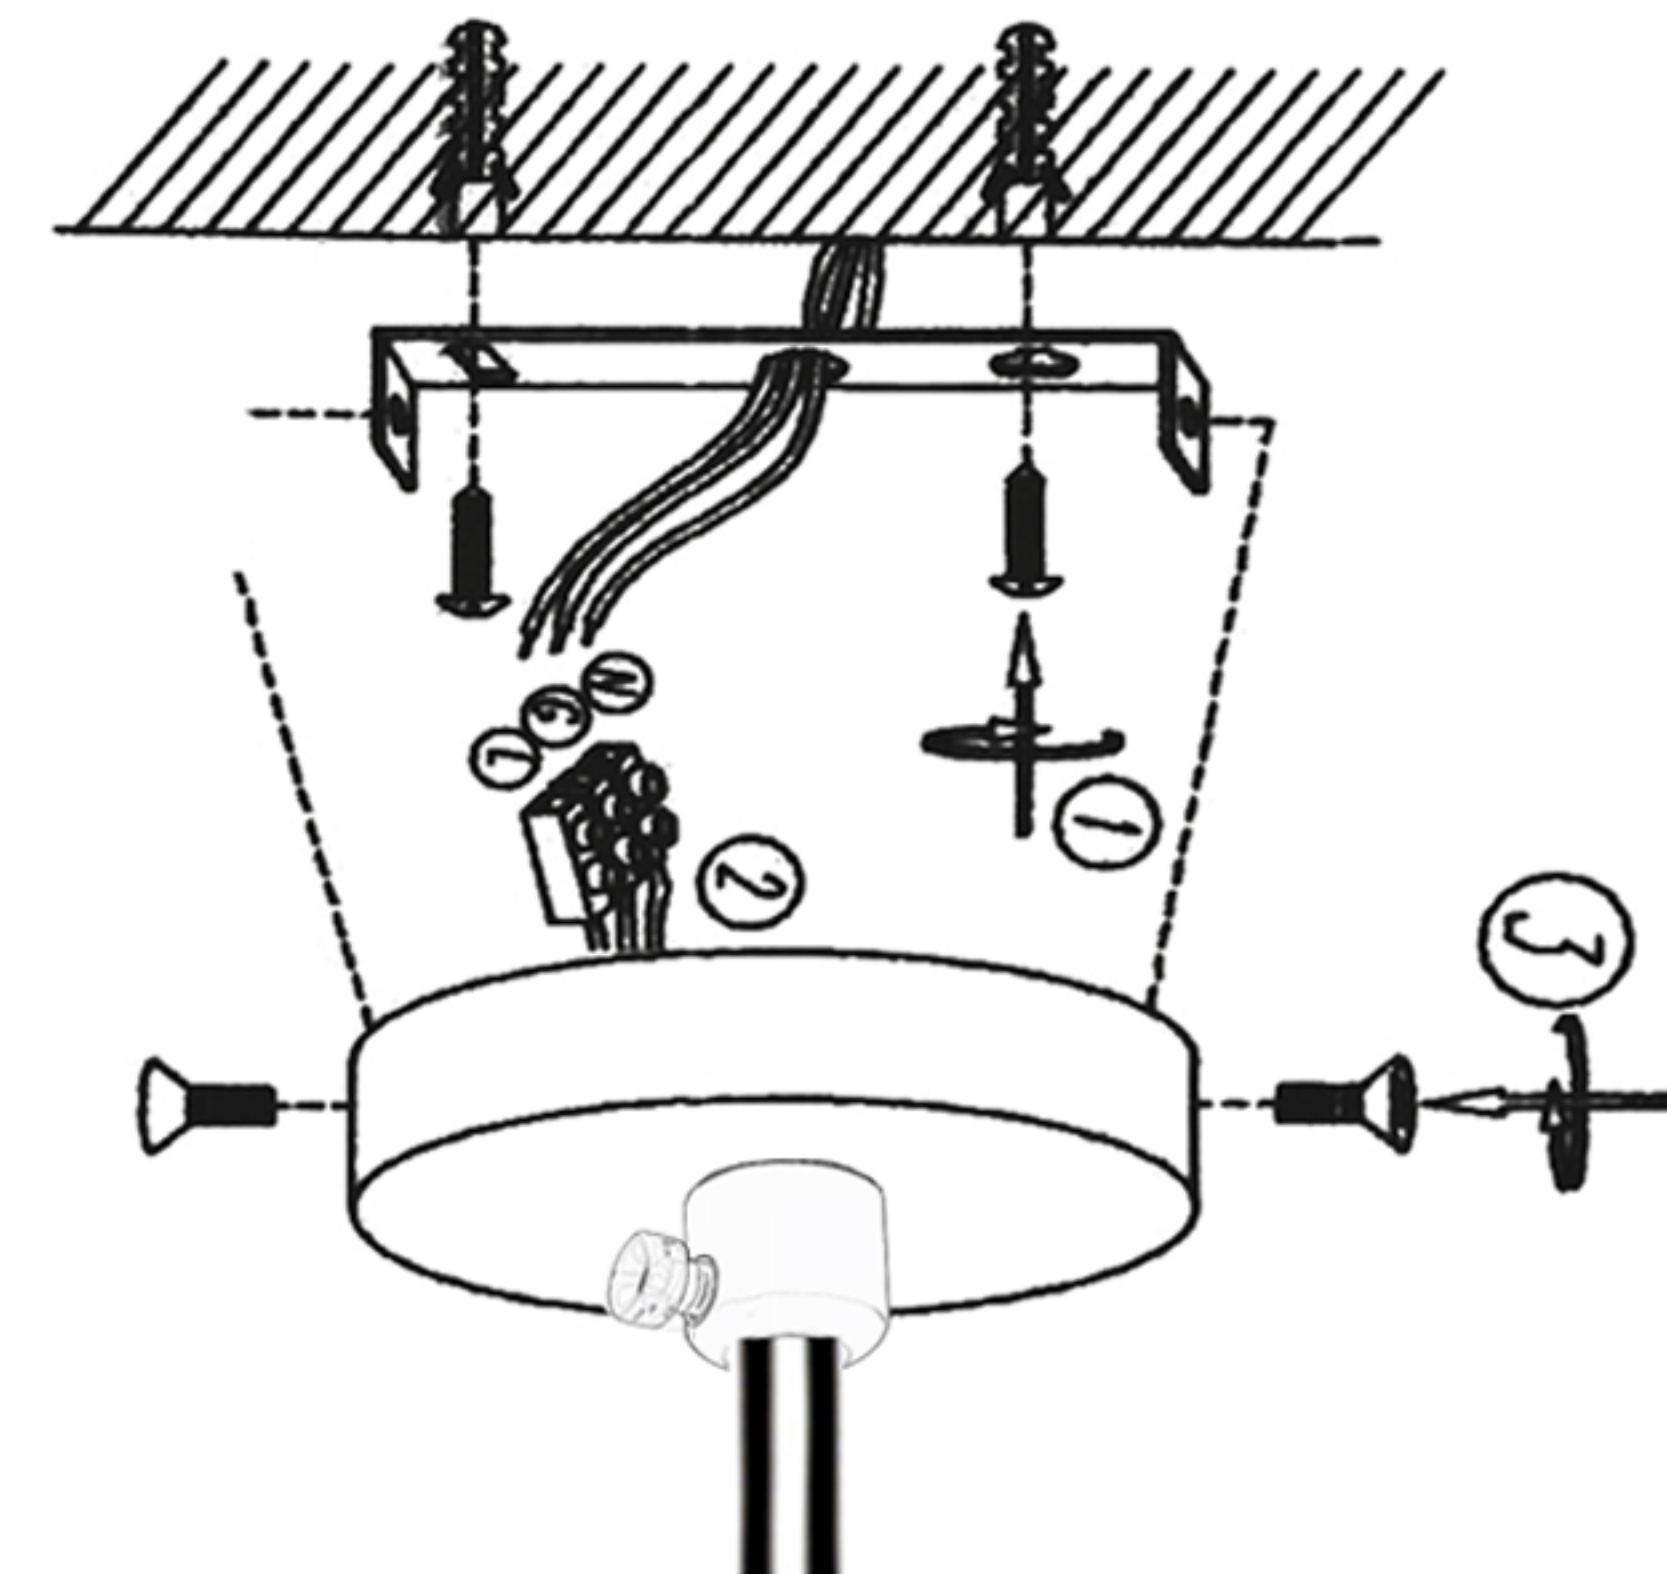

1 Installation Step One

2 Installation Step Two

3 Installation Step Three

preventive measure

1. Rated voltage: 110 V.
2. During installation, avoid scratching the lampshade and the wires. Please wear gloves when installing.
3. The red wire of each lamp holder should be connected to the live wire, other wires to the neutral wire, and the grounding wire to the grounding mark.
4. Do not install lamps on ceilings that are not completely dry.
5. Only use clean soft cloths for cleaning.
6. Before installing, cleaning lamps and replacing bulbs, please turn off the power supply first.
