

“It’s in the details”

As you will discover, our Freestanding Modular Furniture offers a variety of functional components to accommodate a wide range of applications to satisfy the furniture requirements and objectives for projects.

With a comprehensive selection of versatile components, an assortment of storage solutions, and an extensive choice of finish options our Products addresses space and budget requirements with consideration given to personal preferences and work styles. Our Products, will afford you the ability to customize and create the workspace you want, achieving the perfect combination of function and finish.

Designed for practicality, components are modular, easy to specify, easy to assemble and easily reconfigured. Product flexibility combined with modular design allows for quick reconfigurations to adapt to your evolving environments and technology requirements with little disruption and investment.

Through precision engineering and the careful selection of the finest materials and hardware, our Products provides exceptional quality and outstanding value that will afford you optimal performance for years to come.

Feature:

Products ANSI/BIFMA tested. Many of our products have been ANSI/BIFMA tested. As result of our company strategy not to pursue GSA or other Government Contracts we let this certification expire. Our design structures and processes continue to meet or exceed this standard. However, all of the materials used in our products are sourced domestically, Canada and USA. These materials are ANSI/BIFMA certified and comply with other certifications including Environmental. These materials when processed by In2Design will provide you with the safest and reliable performance.

For your reference and edification. Attached are certifications that pertain to the materials used in our products.

Benefit:

Internationally recognized quality standards assure product performance and longevity

Feature:

Products are assembled with interlocking metal-to-metal fittings with reinforced dowel joinery

Benefit:

Ensures components fit together securely and allows for ease of assembly and product reconfiguration Offers superior construction and long-term product performance and re-use

Feature:

Products feature seamless 3mm edging EdgeVantage™

Benefit:

Prevents glue lines and maintains impenetrable seal
3mm thick edging provides added durability and quality with enhanced user safety

Feature:

Products are constructed using Premium Grade 45lb Density High Quality Particle Board Core

Benefit:

Improves structural integrity and product performance with greater holding strength
Products feature 1-1/2" adjustable glides

Benefit:

Allows furniture to be properly leveled to compensate for floor irregularities
Storage components feature internal glide for ease to reach access and adjustment

Feature:

Table shells designed with 1" thick gables

Benefit:

Provides additional structural support to the shell and improves aesthetics

Feature:

Modular, non-handed components

Benefit:

Permits ease of assembly
Facilitates product reconfiguration with the use and re-use of existing parts Minimizes long-term reconfigure & maintenance costs

Feature:

All recessed supporting panels/gables equipped with cable grommets where needed

Benefit:

Accommodates wire management

Feature:

Full and partial height modesty panels available on table shells

Benefit:

Partial modesty panel permits access to electrical outlets Full modesty panel provides under desk privacy

Feature:

Extensive selection of storage products in a variety of configurations

Benefit:

Addresses individual organizational requirements and preferences

Feature:

Storage Drawers and Doors feature ¾" thick construction

Benefit:

Improves structural integrity and product aesthetics

Feature:

130 lb. capacity drawer slides with "Over-Travel" are included on all Storage Drawers

Benefit:

Provides added durability, enhanced product function and smooth operation Permits full access and easily retrieval of stored files

Feature:

File drawers equipped with an "Integrated File Suspension Rail"

Benefit:

Eliminates the need for additional clips or suspension bars

User-friendly integrated design is pre-set to accommodate legal filing; side-to-side or letter filing; front-to-back

Feature:

Fixed and mobile pedestal options

Benefit:

Mobile components increase product flexibility and can be easily relocated

Feature:

Open Overhead Storage Cabinets engineered and pre-drilled for door retrofit

Benefit:

Design accommodates field-installed doors, laminate or glass door options

Feature:

Premium single or multi locks standard on all storage components

Benefit:

Secures personal contents and files
Locks may be keyed-alike or differently per workstation based on user preference and function

Feature:

Broad range of laminate options available

Benefit:

Helps to create a distinctive environment tailored to meet aesthetic requirements

General Construction Features:

- Unique metal-to-metal mini-fix plus dowel joinery system ensures proper alignment of components and unprecedented structural integrity
- Structure is consistent with ANSI/BIFMA Quality Standards
- Heavy Gauge Metal Plates used to connect worksurfaces
- Superb seamless 3MM edge detail with invisible glue line
- Up to 10 Year Product Protection Warranty on Certain Products

Worksurfaces:

- Available in Thermally Fused Melamine Laminate or High-Pressure Laminate, with extensive finish selections
- TFL/Melamine Worksurface measures 1"
- High Pressure Worksurfaces measure 1-1/16"
- Premium grade high density particleboard core
- 3mm thick PVC edge provides added durability and quality with enhanced user safety

Support Panels/Gables:

- Available in Thermally Fused Melamine Laminate TFL
- All Panels/Gables are 1" thick for superior support and aesthetics
- Recessed Panels/gables furnished with cable grommet with snap on cover to provide efficient wire management where needed
- Recessed Panels/Gables measure 12" to 18" deep (depends on worksurface depth) to permit uninhibited movement between the worksurface & adjoining return
- All Panels/Gables are non-handed for ease of reconfiguration
- Leading edge (user side and back-side) finished with 3mm PVC edge-band for added durability and user safety.
- All edges of Panels/Gable are finished - leaving no exposed raw edges
- Supporting Panels/Gables include 1-1/2" leveling glides

Modesty Panels:

- Available in Thermally Fused Melamine Laminate TFL
- Partial & Full Modesty Panels available, Partial Modesty measures 18-1/2" h
- **Partial Modesty panel permits access to electrical outlets and passive air circulation**
- All modesty panels are 3/4" thick
- All edges are finished with 1mm PVC edge-band – leaving no exposed edges
- Some Product Designs Includes 1-1/2" leveling glide

Pedestal Storage Construction Features:

- Drawer fronts are constructed from thermally fused Melamine/TFL & HP Laminate
- Drawer Front thickness is ¾" thick
- 3mm PVC edge provided on drawer fronts
- Pedestal frame is available in Melamine/TFL Laminate
- Top Box/Utility drawer includes pencil tray
- File drawer is equipped with integrated file suspension rails
- All File drawers equipped with 130 lb. drawer slides with over travel to provide smooth operation and for full access to files
- Rectilinear Handle standard, optional handle available
- High quality Multi-Locks with anti-tip feature standard on Mobiles & Laterals
- Variety of Drawer Configurations available
- Fixed & Mobile Pedestals available

Overhead Storage Construction Features:

- Overhead Storage Top, Gables, and valance constructed of ¾" thick thermally fused laminate, Melamine/TFL or High Pressure
- Doors available; Hinged as standard
- Laminated doors constructed from thermally fused Melamine/TFL or HP laminate ¾" thick
- Hinged Glass Door Option available with Aluminum Frame
- Hinged Laminate & Glass Doors are retrofittable
- Back Panel constructed of ¾" thick thermally fused Melamine/TFL Laminate
- Features integral wire management to conceal and route task-light cords
- Vertical wire manager is included in both gables of the cabinet to conceal task-light cord
- Back Panel offers 1" wire access fitted with a flexible vinyl sweep at worksurface height
- Task-lights CSA & UL Tested & Approved

Power Modules Generic Features:

- Power Options will vary depending on product
- 15A/120V AC Receptacles (USB A & C Product Receptacles are Tamper Resistant)
- (2) 2.1A/5V Shared; Dual USB Charging Ports (Available on Select Models) or (1) 2.4A Reversible USB-A Charging Port & (1) 60- Watt USB-C Power Delivery Port with GaN Technology
- Data & HDML options available
- Convenience Outlets (Available on Select Models)
- Standard Cord and Hardwire Whip Length: 108" - Corded Units Equipped with 90-Degree Plug
- Customizable Telecom Plate Knockout (Available on Select Models; Plate Purchased Separately)
- Clamp and Screw-Mounting Capabilities
- Fits Surface Thicknesses: 0.75" - 1.25"
- Optional Mounting Bracket for Surface Thicknesses Up-to 1.50"
- Table Cutout: Varies by Configuration - See Install Sheet for Details
- UL Listed for US
