EASY TO INSTALL

No wiring required, just connect the solar powered outdoor lights with the pole and spike. And choose your favorite place (usually can receive full sunshine anytime)

It doesn't light up during the day, but it does at night. It also doesn't light up even when there's a light source.

The switch is in the white lampshade

1. Untwist Solar Cap Counterclockwise

2. Take out the bulb

3. Remove Lamp Shade Counterclockwise

4. Turn on switch

5. Attach Spike To Pole

PS: The spikes inside the package are in the tube. Just pull them out.
