Installation tools

Start assembly:

1. Take out the left, right, middle brackets, and top layer board of the side bracket and install them with large screws (pay attention to aligning the grooves of the layer board with the side bracket).

2. Take out the large layer board and install the small layer board with large screws.

3. Take out the short back board and insert the short back stopper along the bracket groove.

4. Take out the long backplane and insert it along the bracket groove.

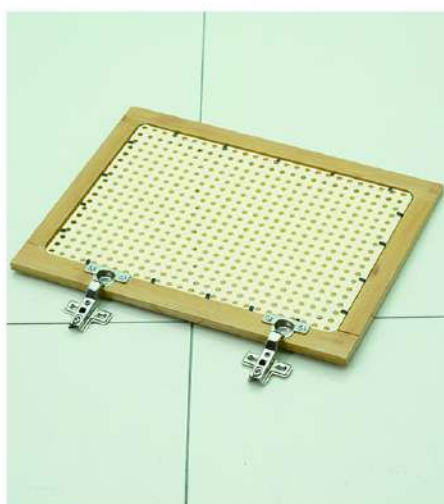

5. Take out the large bottom plate and install the small bottom plate with large screws.

6. Take out the Blocking strip and install it with a medium screw.

7. Flip the shelf.

8. Take out the door panel and hinge and install them with small screws

9. Fix the installed door panel to the rack with small screws.
