ASSEMBLY INSTRUCTIONS

Step 1: Prepare & Identify

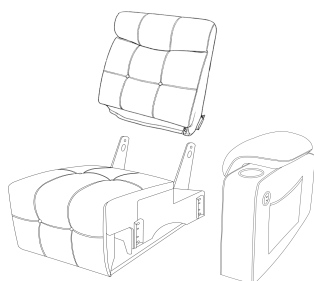

Unpack all 3 boxes and lay out parts on a clean, soft surface (like carpet) to prevent scratches. Identify the seat bases, backrests, and armrests.

Step 2: Connect Backrests to Seat Bases

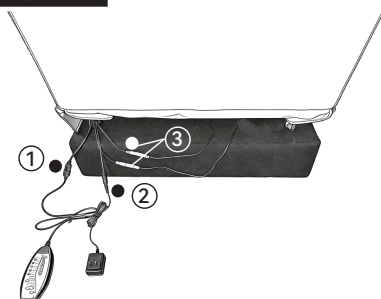

You'll find the legs and hardware stored inside the ottoman compartment.

Step 3: Attach the Armrests

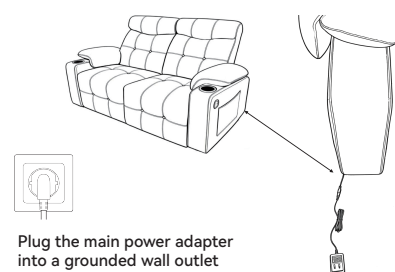

Find the side connection slots on the outer edges of the assembled seat/back units. Take each armrest and align its internal brackets with these slots. Slide the armrest straight inward until it is fully seated and flush against the side of the sofa. Some models may require tightening a pre-installed screw underneath the armrest using the provided Allen key.

Step 4: Connect the cables

1. The thick cable connects to the massage controller.
2. The thin cable connects to the power supply.
3. Connect the wires of the same color to link the seat and the back massage module.

Step 5: Connect the Power

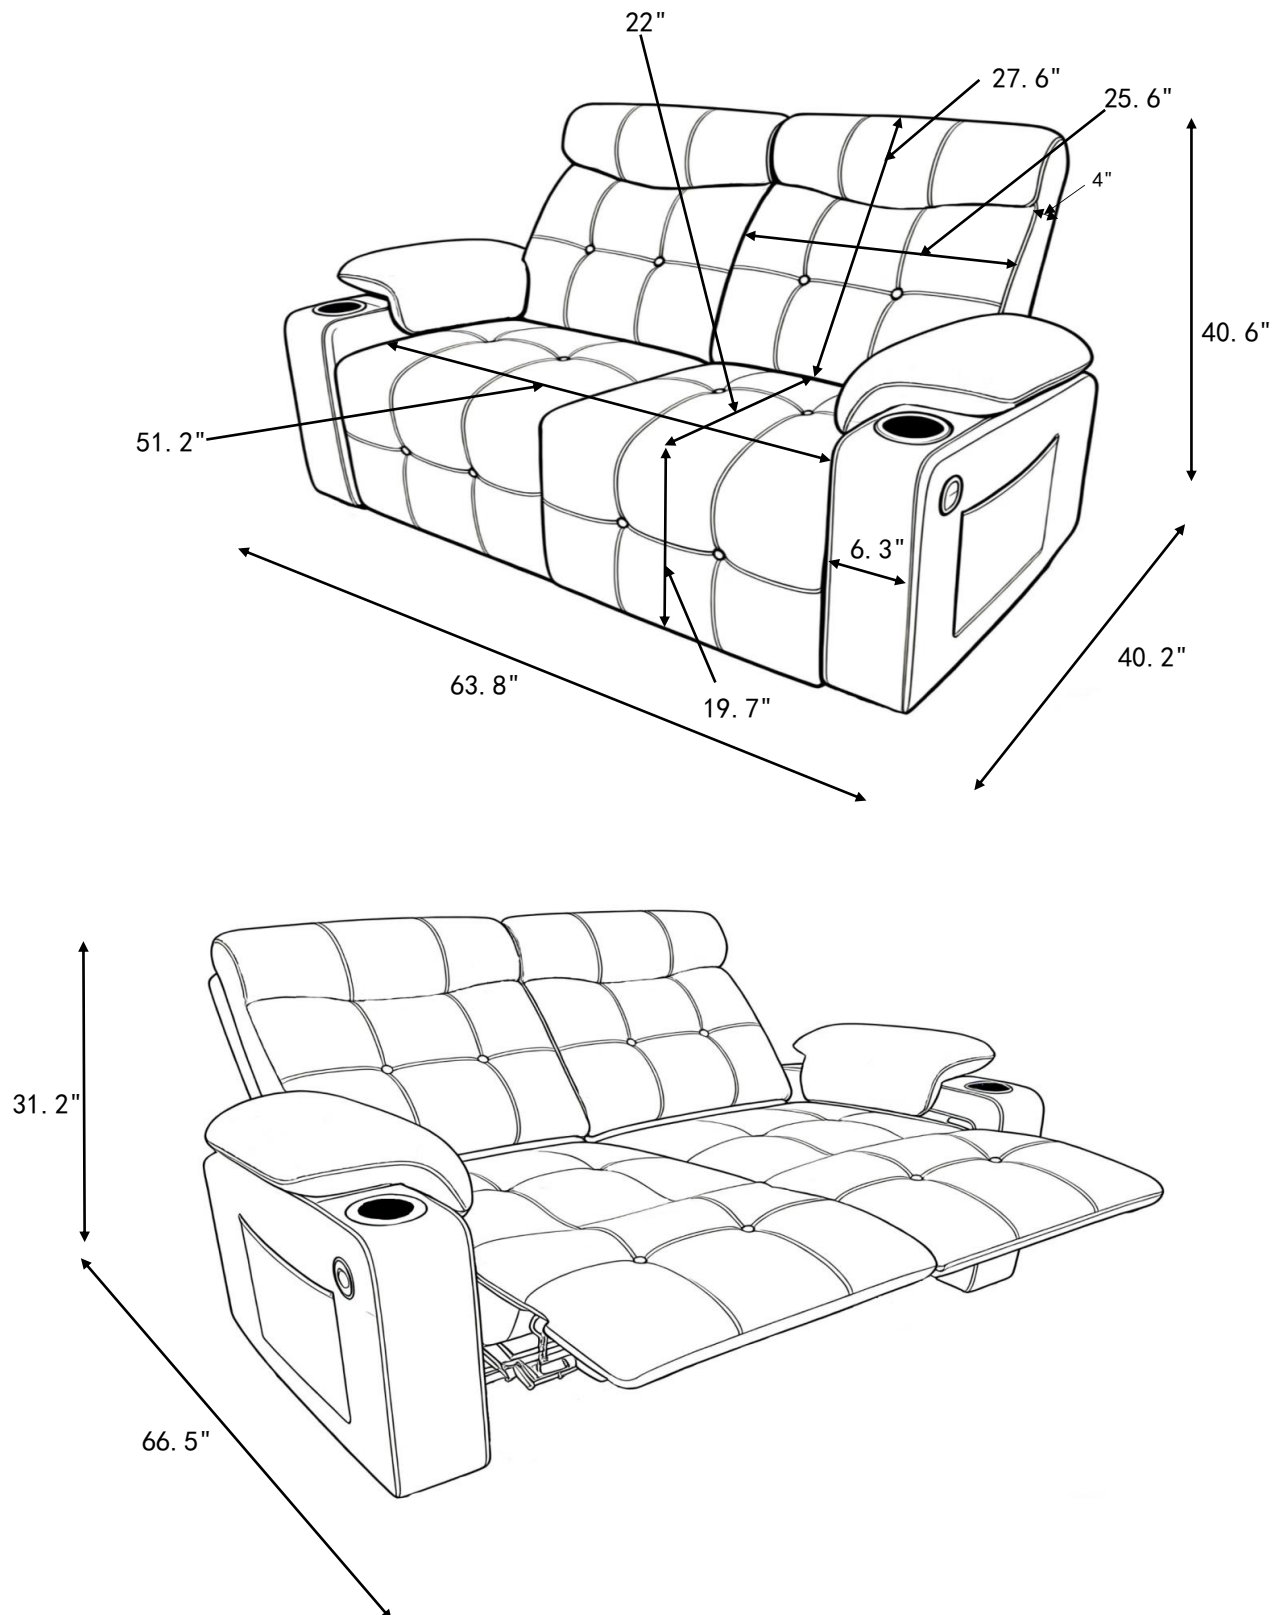

Plug the main power adapter into a grounded wall outlet

Route the power cables from each seat unit to the designated central connection point or power adapter. Ensure all connectors are fully and securely plugged in.

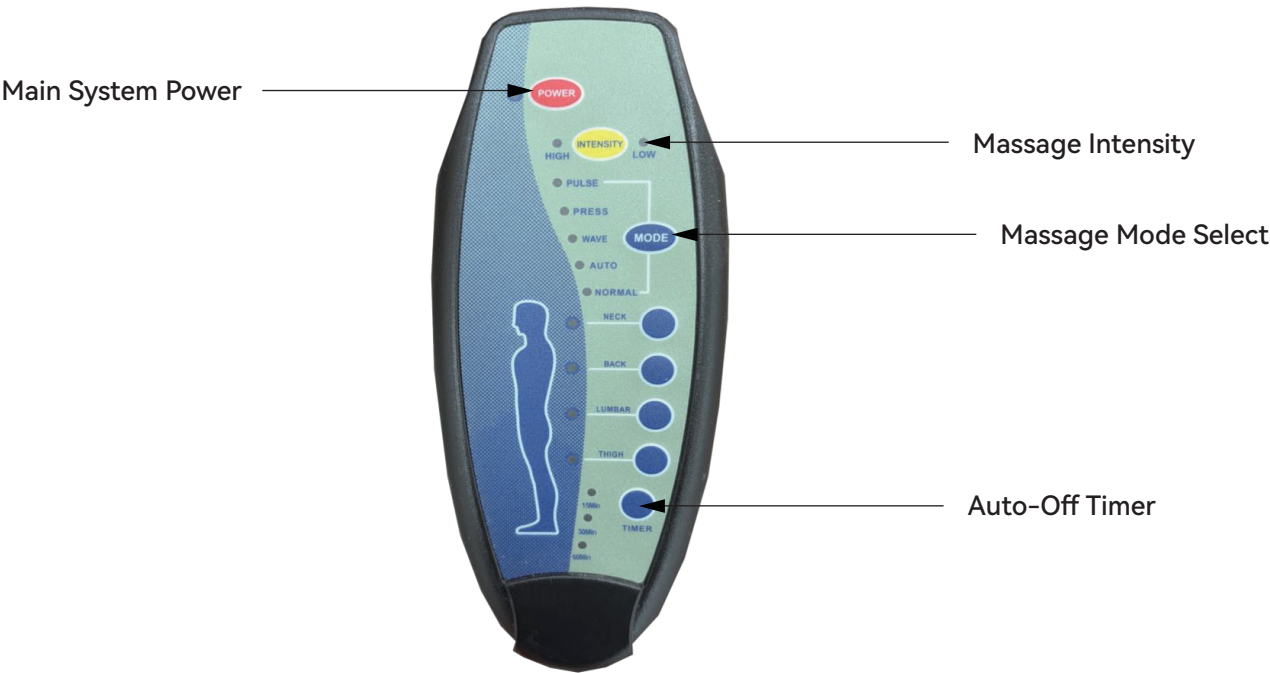

Final Check & Test: Before use, gently rock the sofa to ensure all connections (backrests, armrests) are stable. Plug the power adapter into a wall outlet. Use the remotes to test the basic recline function of each seat (without sitting on it) to confirm electrical setup is correct.

⚠ Maximum weight capacity: 1000lbs
