FINISH	Brushed nickel
SIDESPRAY	N/A
SPOUT HEIGHT	4-15/16"
SPOUT REACH	5-1/2"
SPOUT SWIVEL	NO
CARTRIDGE TYPE	Ceramic
POP-IP INCLUDED	NO
MAX DECK THICKNESS	1-3/4" MAX

01

Disassemble the locking nut, mounting washer and rubber washer from the mixer body in turn.

02

Insert the upper lift rod into the slot on the back of the mixer body. Connect the upper lift rod with the lower lift rod. Screw the knitted hose with red(hot) in front and blue(cold) in back.

03

Pass the mixer body through the counter top, install the rubber washer and the mounting washer. Tighten them with the locking nut.

04

Connect the two knitted hoses to the two triangle valves (Red for hot water and blue for cold water). Connect the lower lift rod to the waste set.

05

Run the water to check if the product is well installed.

06

If flow rate of the water gradually decreases after some time, it may results from aerator blockage. Please clean the aerator as shown in figure above: Turn off the handle, disassemble the aerator with the spanner, wash the aerator and then install it back.
